Excerpt from Coal and the Coal Mines In treating of so large a theme in so small a compass it is impossible to do more than make an outline sketch It has been the aim of the author to give reliable information free from minute details and technicalities That information has been for the most part gathered through personal experience in the mines The literature of this special subject is very meagre and the author is unable to acknowledge any real indebtedness to more than half a dozen volumes First among these is the valuable treatise on Coal Mining by H M Chance of the Pennsylvania Geological Survey Other volumes from which the author has derived considerable information are the State geological reports of Pennsylvania the mine inspector s reports of the same State and the Coal Trade Annuals issued by Frederick E Seward of New York About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
