Dodging Bullets Robert N. McCauley, Judith S. Ruud, Frank Iacono, 1999-11-22 An entertaining summary of the broad reshaping of U S corporate finance in the last decade and a half The late 1980s saw a huge wave of corporate leveraging The U S financial landscape was dominated by a series of high stakes leveraged buyouts as firms replaced their equity with new fixed debt obligations Cash financed acquisitions and defensive share repurchases also decapitalized corporations This trend culminated in the sensational debt financed bidding for RJR Nabisco the largest leveraged buyout of all time before dramatically reversing itself in the early 1990s with a rapid return to equity This entertaining summary of the broad reshaping of U S corporate finance in the last decade and a half looks at three major issues why corporations leveraged up in the first place why and how the leverage wave came to an end and what policy lessons are to be drawn Using the Minsky Kindleberger model as a framework the authors interpret the rise and fall of leveraging as a financial market mania In the course of chronicling the return to equity in the 1990s they address a number of important corporate finance questions How important was the return to equity in relieving corporations debt burdens How did the return to equity affect the ability of young high tech firms to finance themselves without selling out to foreign firms

Why Companies Do Not Pursue Attractive Mergers and Acquisitions Richard B. Connell, 2008 There are substantial bodies of literature that advance theory about why merger and acquisition candidates are found to be unattractive why negotiations are not concluded and why the benefits of companies that are acquired are not realised Little if any research identifies why merger and acquisition opportunities are not pursued in the period after candidates are analysed and found to be attractive but before negotiations begin This study addresses this period by developing a theoretical framework of the variables that intervene to reverse decisions to pursue apparently attractive candidates before negotiations begin and which in doing so result in missed opportunities The study is informed primarily by the strategic management content literature but draws from the strategy process literature including streams in strategic decision making SDM and behavioural decision theory BDT This is a critical book for business scholars that provides an important perspective that has not yet been studied

Megabank Consolidations in the United States Ashford Maharaj, 2005-07 Megabank consolidations in the United States The enigma continues investigates merger of equals among megabanks as a business model and also postulates that higher premiums are paid for the right to integrate with the very large banks versus that paid for the right to integrate with relatively smaller banks By introducing merger of equals and megabank premium comparatives the author has filled a void left vacant by previous researchers investigating inorganic growth among banks in the U S banking industry Decision makers academicians policy makers and students of finance will once more be looking for what is out there in order to guide understandings and decisions re the integration aspects among financial intermediaries The book sought to

illuminate a clarity of understanding involving the analysis and interpretation of organic versus inorganic growth among megabanks in the United States Despite the general destruction of shareholders incremental value brought about through inorganic growth the enigma continues in that banks proceed to integrate at an accelerating pace over the past two decades though there was a brief lull early in this new Millennium

Bank Mergers and Acquisitions in the United States 1990 -1997 Ashford Maharaj, 2002-06 This study focused on factors that have positively influenced the model of economic success for commercial and thrift megabanks involved in merger and acquisition activities for the period 1990 1997 a period characterized by an unprecedented flurry of merger and acquisition activities among megabanks in the United States This study identified and measured key independent variables for identifiable mergers and acquisitions among megabanks and tested the extent to which such independent variables influenced abnormal returns for underlying equities traded in capital markets This study also tested the hypothesis that megabanks are attracting significantly higher acquisition premiums than the relatively smaller banks The data collected and the conclusions drawn were based on the logic of a hypothetico deductive paradigm which essentially utilized the techniques of the standard event study methodology and included parameters of the conventional Capital Asset Pricing Model This study was based on a scientifically determined sample of over 200 banks in the small bank category and between 68 and 86 banks grouped under the megabank category The findings revealed that megabank acquirers realized negative abnormal returns and that megabank acquirees did not realize economic value

significantly greater than acquirers for those banks that integrated on a merger of equals basis The findings also showed that megabanks seemed more willing to pay higher premiums for the right to integrate with other megabanks vis a vis the right to integrate with small banks

Do the Right Deal, Do the Deal Right Barry Massoudi, 2006 *Corporate Diversification and the Effects of Firm Characteristics on Diversification Modes* Somkiat Mansumittrchai, 2000 **Applied Mergers and Acquisitions** Robert F. Bruner, 2016-02-08 A comprehensive guide to the world of mergers and acquisitions Why do so many M A transactions fail And what drives the success of those deals that are consummated Robert Bruner explains that M A can be understood as a response by managers to forces of turbulence in their environment Despite the material failure rates of mergers and acquisitions those pulling the trigger on key strategic decisions can make them work if they spend great care and rigor in the development of their M A deals By addressing the key factors of M A success and failure Applied Mergers and Acquisitions can help readers do this Written by one of the foremost thinkers and educators in the field this invaluable resource teaches readers the art and science of M A valuation deal negotiation and bargaining and provides a framework for considering tradeoffs in an effort to optimize the value of any M A deal

Mastering the Merger David Harding, Sam Rovit, 2004-11-04 Today s corporate deal makers face a conundrum Though 70% of major acquisitions fail it s nearly impossible to build a world class company without doing deals In Mastering the Merger David Harding and Sam Rovit argue that a laserlike focus on just four key imperatives before executives finalize the deal can dramatically improve the odds of M 2 determining which deals to close and when to walk away 3 identifying where to integrate and where not to and 4 developing contingency plans for when deals inevitably stray Top deal makers also favor a succession of smaller deals over complex megamergers and essentially institutionalize a success formula over time Helping executives zero in on what matters most in the complex world of M A Mastering the Merger offers a blueprint for the decisions and strategies that will beat the odds
