1999 International Television Video Almanac:

International Television & Video Almanac, 2007 International Television and Video Almanac Tracy Stevens, 2001

Hollywood Stardom Paul McDonald, 2012-11-26 By integrating star studies and film industry studies Hollywood

Stardom reveals the inextricable bonds between culture and commerce in contemporary notions of film stardom Integrates the traditions of star studies and industry studies to establish an original and innovative mode of analysis whereby the star image is replaced with the star brand Offers the first extensive analysis of stardom in the post studio era Combines genre narrative acting and discourse analysis with aspects of marketing theory and the economic analysis of the film market Draws on an extensive body of research data not previously deployed in film scholarship A wide range of star examples are explored including George Clooney Mel Gibson Tom Cruise Daniel Day Lewis Tom Hanks Will Smith and Julia Roberts **A**

Longitudinal Analysis of Vertical Integration and Ownership Diversity in Broadcast TV Programming, 1993-2006

Heejung Kim, 2008 The Enduring Library Michael Gorman, 2003-01-23 In this work one of the library world's thinkers discusses the transformative effect that communications technology has had on information delivery from past to present to future By tracing these transformations Michael Gorman writes a roadmap for achieving balance between the tradition of library service and ever changing technology *The Digital Glocalization of Entertainment* Paolo Sigismondi, 2011-08-31 In this volume Paolo Sigismondi explores the dynamics of global media and entertainment specifically analyzing the implications of the global rise of non scripted entertainment as reality TV programs and the impact and consequences of the Information and Communication Technology ICT revolution on the content delivery platforms and overall business models of the media and entertainment landscape This work aims at bridging the gap between media theories and industry practices in a rapidly evolving global mediascape building on scholarship in the field and enriched by case studies and insights from business practice This work demonstrates that the paradigms of the landscape are shifting introducing the digital glocalization of entertainment through which successful media crossing national and cultural borders incorporate both global and local features Key questions raised include Is the ICT revolution an example of disruptive technology for the global media and entertainment industry Is the existing status quo challenged and in particular Hollywood's global leadership What are the global entities emerging as Hollywood's main competitors in this technologically evolving landscape Sigismondi argues that as new players are entering the field new threats to Hollywood's dominance are emerging The global leaders in non scripted entertainment for example are European based global entities operating outside the Hollywood system Meanwhile the ICT revolution is modifying the contours and boundaries of the global mediascape Sigismondi's approach provides unique insight into how the forces of technology and globalization are transforming television cinema and online entertainment

Handbook of Communication and Aging Research Jon F. Nussbaum, Justine Coupland, 2004-04-12 This second edition of the Handbook of Communication and Aging Research captures the ever changing and expanding domain of aging

research Since it was first recognized that there is more to social aging than demography gerontology has needed a communication perspective Like the first edition this handbook sets out to demonstrate that aging is not only an individual process but an interactive one The study of communication can lead to an understanding of what it means to grow old We may age physiologically and chronologically but our social aging how we behave as social actors toward others and even how we align ourselves with or come to understand the signs of difference or change as we age are phenomena achieved primarily through communication experiences Synthesizing the vast amount of research that has been published on communication and aging in numerous international outlets over the last three decades the book s contributors include scholars from North America and the United Kingdom who are active researchers in the perspectives covered in their particular chapter Many of the chapters work to deny earlier images of aging as involving normative decrement to provide a picture of aging as a process of development involving positive choices and providing new opportunities A recurring theme in many chapters is that of the heterogeneity of the group of people who are variously categorized as older aged elderly or over 65 The contributors review the literature analytically in a way that reveals not only current theoretical and methodological approaches to communication and aging research but also sets the future agenda This handbook will be of great interest to scholars and researchers in gerontology developmental psychology and communication and in this updated edition will continue to play a key role in the study of communication and aging

The Television Will Be Revolutionized, Second Edition Amanda D Lotz, 2014-09-19 Incredibly prescient the revised edition updates its account to reflect an age when Hulu Netflix and Amazon are now competing for Emmy and Peabody Awards Henry Jenkins coauthor of *Spreadable Media: Creating Meaning and Value in a Networked Culture* Many proclaimed the end of television in the early years of the twenty first century as capabilities and features of the boxes that occupied a central space in American living rooms for the preceding fifty years were radically remade In this revised second edition of her definitive book Amanda D Lotz proves that rumors of the death of television were greatly exaggerated and explores how new distribution and viewing technologies have resurrected the medium Shifts in the basic practices of making and distributing television have not been hastening its demise but redefining what we can do with it what we expect from it how we use it in short revolutionizing it Television as both a technology and a tool for cultural storytelling remains as important today as ever but it has changed in fundamental ways *The Television Will Be Revolutionized* provides a sophisticated history of the present examining television in what Lotz terms the post network era while providing frameworks for understanding the continued change in the medium The second edition addresses adjustments throughout the industry wrought by broadband delivered television such as Netflix YouTube and cross platform initiatives like TV Everywhere as well as how technologies such as tablets and smartphones have changed how and where we view Lotz begins to deconstruct the future of different kinds of television exploring how prized content live televised sports and linear viewing may all be television but very different types of television for both viewers and producers

Through interviews with those working in the industry surveys of trade publications and consideration of an extensive array of popular shows Lotz takes us behind the screen to explore what is changing why it is changing and why the changes matter A thorough and engaging analysis Velvet Light Trap Thick with trade facts and figures Popular Communication

Corporation for Public Broadcasting Authorization Act of 1999 United States. Congress. House. Committee on Commerce. Subcommittee on Telecommunications, Trade, and Consumer Protection,1999 **Who Owns the Media?** Benjamin M. Compaine,Douglas Gomery,2000-07-13 This long awaited third edition analyzes corporate ownership of major media including television film on line and print and includes primary influences government s roles and key criteria for evaluating the current state of media ownership George Clooney Paul McDonald,2019-05-02 Paul McDonald s study of the actor filmmaker George Clooney traces the star s career from his role in the hit television medical drama ER to his dual screen persona allowing him to move seamlessly from commercial hits such as Out of Sight 1998 and Ocean s Eleven 2001 to more offbeat roles in such films as Oh Brother Where Art Thou 2000 McDonald also considers Clooney s political activism and his roles in such explicit political films as Three Kings 1999 and Syriana 2005 as well as his work as a producer of films including Argo 2012 and as director of Confessions of a Dangerous Mind 2002 Good Night and Good Luck 2005 and Suburbicon 2017 among others McDonald places Clooney in the context of the Hollywood star system considering the argument that Clooney s star persona has many similarities with that of Classical Hollywood movie stars such as Cary Grant but also addresses Clooney as a very 21st century transmedia celebrity *Consuming Environments* Mike Budd,Steve Craig,Clayton M. Steinman,1999 This is an exploration of how much TV people watch why they watch too much and what they see The authors argue that while people may have good reasons for watching television they seem to be unaware that such habits might be harmful to their environmental health The book examines how advertising and media companies have shaped the commercial content of most television tracing industry motives and operations and their increasing concentration in fewer hands **Stars at War** Marvin D. Pipher,2022-11-30 This book outlines the lives and achievements of one hundred entertainers and athletes mostly Americans who served their nations well both in times of war and in times of peace It spans the period from the Spanish American War 1898 up to 2020 but concentrates most heavily on World War II The book was initiated in response to an apparent difference noted between the reactions of entertainers and athletes to the events of September 11 2001 and those following the attack on Pearl Harbor on December 7 1941 It began as an effort to understand who those earlier people were what they did and why to identify the one hundred who did the most during World War II and to rank them in accordance with their achievements This proved to be an impossible task since there was no way to identify the one hundred and there was no common basis for comparison some were truly heroic some were wounded and some killed while others simply served to the best of their abilities The best that could be done was to categorize the men and women selected and subjectively rank them with their peers Over time this effort expanded to be more inclusive touching lightly

upon the Spanish American War World War I the Korean War Vietnam the war on terror and upon more recent events Some of those presented herein served before becoming famous some after some volunteered and some were drafted while others served as civilians in their chosen fields Two became presidents of the United States Three won the Congressional Medal of Honor Aside from their service however these were truly remarkable men and women whose stories deserve to be told if for no other reason than to give us a glimpse into the kinds of people who made the United States the greatest nation in the history of the world

NBC Michele Hilmes, 2007-08-01 Spanning eight decades from the beginnings of commercial radio to the current era of international consolidation and emerging digital platforms this pioneering volume illuminates the entire course of American broadcasting by offering the first comprehensive history of a major network Bringing together wide ranging original articles by leading scholars and industry insiders it offers a comprehensive view of the National Broadcasting Company NBC that brings into focus the development of this key American institution and the ways that it has intersected with and influenced the central events of our times Programs policy industry practices and personnel politics audiences marketing and global influence all come into play The story the book tells is not just about broadcasting but about a nation's attempt to construct itself as a culture with all the underlying concerns divisions opportunities and pleasures Based on unprecedented research in the extensive NBC archives NBC America's Network includes a timeline of NBC's and broadcasting's development making it a valuable resource for students and scholars as well as for anyone interested in the history of media in the United States

We Now Disrupt This Broadcast Amanda D. Lotz, 2018-04-13 The collision of new technologies changing business strategies and innovative storytelling that produced a new golden age of TV Cable television channels were once the backwater of American television programming recent and not so recent movies and reruns of network shows Then came *La Femme Nikita* *OZ* *The Sopranos* *Mad Men* *Game of Thrones* and *The Walking Dead* And then just as prestige cable became a category came *House of Cards* and Netflix Hulu Amazon Video and other Internet distributors of television content What happened In *We Now Disrupt This Broadcast* Amanda Lotz chronicles the collision of new technologies changing business strategies and innovative storytelling that produced an era termed peak TV Lotz explains that changes in the business of television expanded the creative possibilities of television She describes the costly infrastructure rebuilding undertaken by cable service providers in the late 1990s and the struggles of cable channels to produce and pay for original scripted programming in order to stand out from the competition These new programs defied television conventions and made viewers adjust their expectations of what television could be *La Femme Nikita* offered cable's first antihero *Mad Men* cost more than advertisers paid *The Walking Dead* became the first mass cable hit and *Game of Thrones* was the first global television blockbuster Internet streaming didn't kill cable Lotz tells us Rather it revolutionized how we watch television Cable and network television quickly established their own streaming portals Meanwhile cable service providers had quietly transformed themselves into Internet providers able to profit from both prestige cable and

streaming services Far from being dead television continues to transform Broadcasting in the United Kingdom Barrie I. MacDonald,1988 **REDESIGNING WOMEN** Amanda D. Lotz,2010-10-01 In the 1990s American television audiences witnessed an unprecedented rise in programming devoted explicitly to women Cable networks such as Oxygen Media Women s Entertainment Network and Lifetime targeted a female audience and prime time dramatic series such as Buffy the Vampire Slayer Judging Amy Gilmore Girls Sex and the City and Ally McBeal empowered heroines single career women and professionals struggling with family commitments and occupational demands After establishing this phenomenon s significance Amanda D Lotz explores the audience profile the types of narrative and characters that recur and changes to the industry landscape in the wake of media consolidation and a profusion of channels Employing a cultural studies framework Lotz examines whether the multiplicity of female centric networks and narratives renders certain gender stereotypes uninhabitable and how new dramatic portrayals of women have redefined narrative conventions Redesigning Women also reveals how these changes led to narrowcasting or the targeting of a niche segment of the overall audience and the ways in which the new sophisticated portrayals of women inspire sympathetic identification while also commodifying viewers into a marketable demographic for advertisers *Index to American Reference Books Annual* ,2000 Ulrich's Periodicals Directory 2003 Edgar H. Adcock (Jr.),2003 **Encyclopedia of Business Information Sources** Linda D. Hall,2008 Each updated edition of this detailed resource identifies nearly 35 000 live print and electronic sources of information listed under more than 1 100 alphabetically arranged subjects industries and business concepts and practices Edited by business information expert James Woy
