2001 *Magruder's American Government* William A. McClenaghan, Frank Abbott Magruder, 2001 **Social Studies Curriculum Resource Handbook**, 1992 Civic Education for Diverse Citizens in Global Times Beth C. Rubin, James M. Giarelli, 2013-10-11 This book explores four interrelated themes rethinking civic education in light of the diversity of U S society re examining these notions in an increasingly interconnected global context re considering the ways that civic education is researched and practiced and taking stock of where we are currently through use of an historical understanding of civic education There is a gap between theory and practice in social studies education while social studies researchers call for teachers to nurture skills of analysis decision making and participatory citizenship students in social studies classrooms are often found participating in passive tasks e g quiz and test taking worksheet completion listening to lectures rather than engaging critically with the curriculum Civic Education for Diverse Citizens in Global Times directed at students researchers and practitioners of social studies education seeks to engage this divide by offering a collection of work that puts practice at the center of research and theory The Balance of the Future Mark Reiner, 2005-06 Do you make decisions based upon assumptions We all do Assumptions are often based upon unexamined perceptions Most of our perceptions are understood through duality good bad black white male female This book explores some of these perceptions They hold a hidden key not only to our understanding of the past but also to our possible future The recognition of our global crisis is universal whether conscious or subconsciously This juncture holds the possibility of our remaining within our painful self destructive patterns or of creating a glorious leap forward into a stable free and peaceful world This book offers an in depth look at our assumptions shows how they have driven our history and may taint our future In addition opportunities are offered to enhance our individual and collective consciousness Are we courageous enough to take them *Political Keywords* Roderick P. Hart, 2005 The Declaration of Independence states that all men are created equal in the United States but that statement does not hold true for words Some words carry more weight than others they seem to work harder get more done and demand more respect Political Keywords Using Language That Uses Us looks at eight dominant words that are crucial to American political discourse and how they have been employed during the last fifty years Based on an analysis of eleven separate studies of political language Political Keywords helps readers to understand what these terms mean and how they are used For example the book tracks what politics now means to modern commentators how school teachers impress certain values upon the nation s children by invoking the office of the president and why an innocent word like government sometimes makes people so upset It details how the people are referenced in political talk and how the media portray themselves The book also considers the work done by political parties political promises and political consultants because together they shed special light on modern elections Combining social science with subtle forms of cultural interpretation Political Keywords Using Language That Uses Us provides a fresh look at both American politics and American language It is

an ideal text for undergraduate and graduate courses in political communication political language political campaigns media and politics political psychology public opinion rhetorical criticism contemporary public address and presidential rhetoric
