*Resurrecting Tenochtitlan* Delia Cosentino,Adriana Zavala,2023-05-16 How Mexican artists and intellectuals created a new identity for modern Mexico City through its ties to Aztec Tenochtitlan

*Understanding the Chiapas Rebellion* Nicholas P. Higgins,2009-12-03 To many observers in the late 1980s and early 1990s Mexico appeared to be a modern nation state at last assuming an international role through its participation in NAFTA and the OECD

Organization of Economic Cooperation and Development Then came the Zapatista revolt on New Year s Day 1994 Wearing

ski masks and demanding not power but a new understanding of the indigenous peoples of Mexico Subcomandante Marcos and his followers launched what may be the first post or counter modern revolution one that challenges the very concept of the modern nation state and its vision of a fully assimilated citizenry This book offers a new way of understanding the Zapatista conflict as a counteraction to the forces of modernity and globalization that have rendered indigenous peoples virtually invisible throughout the world Placing the conflict within a broad sociopolitical and historical context Nicholas Higgins traces the relations between Maya Indians and the Mexican state from the conquest to the present which reveals a centuries long contest over the Maya people s identity and place within Mexico His incisive analysis of this contest clearly explains how the notions of modernity and even of the state require the assimilation of indigenous peoples With this understanding Higgins argues the Zapatista uprising becomes neither surprising nor unpredictable but rather the inevitable outcome of a modernizing program that suppressed the identity and aspirations of the Maya peoples Re-mapping the Americas W. Andy Knight, Julián Castro-Rea, Hamid Ghany, 2016-04-01 Since the end of the Second World War the map of the Americas has changed dramatically Not only were many former European colonies turned into sovereign states there was also an ongoing process of region making recognizable throughout the hemisphere and obvious through the establishment of several regional agreements The emergence of political and economic regional integration blocs is a very timely topic analyzed by scholars in many disciplines worldwide This book looks at remapping the recent trends in region making throughout the Americas in a way that hasn t been at the center of academic analyses so far While examining these regionalisation tendencies with a historical background in mind the authors also answer fundamental questions such as What influences does globalization have on region making both on normative regionalism plans as well as on actual economic political cultural military and social regionalization processes driven by state and non state actors What ideas or interests lead states in the Americas to cooperate or compete with one another and how is this power distributed How do these regional agreements affect trade relations and have there been trade barriers set up to protect national economies What agreements exist or have existed and how did they change with regard to contents and for what reason The book informs academic as well as non academic audiences about regional developments in the Americas in particular those dating back to the last twenty years Beyond the primary purpose of summarizing the hemisphere s recent trends the book also brings clarification in a detailed but easy to understand way about timely issues regarding the institutionalisation or lack thereof of the plethora of regional and sub regional bodies that have emerged in this hemisphere over the past couple of decades

**Our Indigenous Ancestors** Carolyne R. Larson, 2015-08-13 Our Indigenous Ancestors complicates the history of the erasure of native cultures and the perceived domination of white European heritage in Argentina through a study of anthropology museums in the late nineteenth and early twentieth centuries Carolyne Larson demonstrates how scientists collectors the press and the public engaged with Argentina s native American artifacts and remains and sometimes living

peoples in the process of constructing an authentic national heritage She explores the founding and functioning of three museums in Argentina as well as the origins and consolidation of Argentine archaeology and the professional lives of a handful of dynamic curators and archaeologists using these institutions and individuals as a window onto nation building modernization urban rural tensions and problems of race and ethnicity in turn of the century Argentina Museums and archaeology she argues allowed Argentine elites to build a modern national identity distinct from the country's indigenous past even as it rested on a celebrated extinct version of that past As Larson shows contrary to widespread belief elements of Argentina's native American past were reshaped and integrated into the construction of Argentine national identity as white and European at the turn of the century Our Indigenous Ancestors provides a unique look at the folklore movement nation building science institutional change and the divide between elite scientific and popular culture in Argentina and the Americas at a time of rapid sweeping changes in Latin American culture and society      *Created from NAFTA* Joseph A. McKinney, 2000 *Created from NAFTA* for the first time provides an in depth examination and analysis of the structure functions and performance of the NAFTA institutions from their inception to the present day      *Global Political Economy* John Ravenhill, 2017 *Global Political Economy* offers a comprehensive introduction to the field by combining theory history and contemporary issues and debates The authors who are all leading international experts introduce readers to the diversity of perspectives in GPE through chapters that combine careful analysis with detailed empirical material New to this edition A rewritten chapter on the Global Trade Regime by Professor Ann Capling and Dr Silke Trommer Increased coverage of the rise of new actors especially the BRICs and the role of developing economies in global governance from back cover

*Minerals Yearbook*, 2000      *Cooperation Between Antitrust Agencies at the International Level* Bruno Zanettin, 2002-10-22 This book focuses bilateral cooperation between antitrust agencies in particular the EC and the US agencies      **Essays on Balance of Payments Constrained Growth** John McCombie, Tony Thirlwall, 2004-03-26 This impressive collection explores the relationship between a country's balance of payments and their rate of economic growth      **Ark of the Broken Covenant** John Charles Kunich, 2003-02-28 Blending scientific and legal expertise Kunich proves that a devastating ecological crisis is imminent or even underway already and that conservation law has yet to catch up with biological science He challenges readers with a hotspots wager arguing that he have vastly more to gain than lose by legally protecting biological hotspots and that foregoing them in favor of the relatively minor and immediate returns arising from their devastation is both foolish and ultimately dangerous Legal thought lags behind modern science in focusing on and setting priorities for global conservation An extinction spasm is imminent many scientists argue due to the ongoing global devastation of biological hotspots home to a disproportionate share of all life forms including perhaps millions of unknown species These hotspots have already lost 88 percent of their primary vegetation and are likely to lose much more yet few legal measures exist to protect them Environmental legal protections are often incomprehensive and feebly enforced Even

worse 62 percent of all hotspots are unprotected Kunich provides a brief history and science of extinction He discusses the importance of saving species from extinction and analyzes the legal measures directed toward preserving biodiversity in nations that harbor hotspots      The Great Leveler Walter Scheidel, 2025-05-20 How only violence and catastrophes have consistently reduced inequality throughout world history Are mass violence and catastrophes the only forces that can seriously decrease economic inequality To judge by thousands of years of history the answer is yes Tracing the global history of inequality from the Stone Age to today Walter Scheidel shows that inequality never dies peacefully Inequality declines when carnage and disaster strike and increases when peace and stability return The Great Leveler is the first book to chart the crucial role of violent shocks in reducing inequality over the full sweep of human history around the world Ever since humans began to farm herd livestock and pass on their assets to future generations economic inequality has been a defining feature of civilization Over thousands of years only violent events have significantly lessened inequality The Four Horsemen of leveling mass mobilization warfare transformative revolutions state collapse and catastrophic plagues have repeatedly destroyed the fortunes of the rich Scheidel identifies and examines these processes from the crises of the earliest civilizations to the cataclysmic world wars and communist revolutions of the twentieth century Today the violence that reduced inequality in the past seems to have diminished and that is a good thing But it casts serious doubt on the prospects for a more equal future An essential contribution to the debate about inequality The Great Leveler provides important new insights about why inequality is so persistent and why it is unlikely to decline anytime soon      *Mine Wastes* Bernd Lottermoser, 2013-04-18 This book is not designed to be an exhaustive work on mine wastes It aims to serve undergraduate students who wish to gain an overview and an understanding of wastes produced in the mineral industry An introductory textbook addressing the science of such wastes is not available to students despite the importance of the mineral industry as a resource wealth and job provider Also the growing importance of the topics mine wastes mine site pollution and mine site rehabilitation in universities research organizations and industry requires a textbook suitable for undergraduate students Until recently undergraduate earth science courses tended to follow rather classical lines focused on the teaching of palaeontology crystallography mineralogy petrology stratigraphy sedimentology structural geology and ore deposit geology However today and in the future earth science teachers and students also need to be familiar with other subject areas In particular earth science curriculums need to address land and water degradation as well as rehabilitation issues These topics are becoming more important to society and an increasing number of earth science students are pursuing career paths in this sector Mine site rehabilitation and mine waste science are examples of newly emerging disciplines This book has arisen out of teaching mine waste science to undergraduate and graduate science students and the frustration at having no appropriate text which documents the scientific fundamentals of such wastes
