Manning,2021-12-14 From its very inception in 1879 until the twentieth century the U S Geological Survey was embroiled in congressional politics These early years Thomas G Manning shows heralded the complex relations of contemporary science and government Born out of rivalry between several scientific parties the Geological Survey was founded primarily for the advancement of mining west of the Mississippi Its scope was soon broadened however and the Survey became national in character The concept of government science was challenged by the conservative Cleveland Democrats but its proponents succeeded in establishing the Survey as a permanent bureau in 1886 Manning traces in detail the careers of the Survey s first two directors Clarence King and John Wesley Powell and adds new dimensions and interpretations to their public lives King sought to make the Survey a center for geological theory as well as practical studies By exceeding the narrow limits of the original

appropriations bill King became vulnerable to the attacks of economy minded congressmen and was dismissed Powell proved a more apt political manipulator and his plans for a nationwide topographical map were salable to the public but his unpopular western land policies almost cost him his position Near the end of the nineteenth century under Powell s successor C D Walcott the Survey was finally able to divorce itself from active politics and its policies were developed in a more fruitful setting     The Mineral Resources of Oregon ,1920     Monthly Catalogue, United States Public Documents ,1993
