Computing Soha Maad,2012-05-16 Grid research rooted in distributed and high performance computing started in mid to late 1990s Soon afterwards national and international research and development authorities realized the importance of the Grid and gave it a primary position on their research and development agenda The Grid evolved from tackling data and compute intensive problems to addressing global scale scientific projects connecting businesses across the supply chain and becoming a World Wide Grid integrated in our daily routine activities This book tells the story of great potential continued strength and widespread international penetration of Grid computing It overviews latest advances in the field and traces the evolution of selected Grid applications The book highlights the international widespread coverage and unveils the future potential of the Grid

Readings in Groupware and Computer-Supported Cooperative Work Ronald M. Baecker,1993-01-13 This comprehensive introduction to the field represents the best of the published literature on groupware and computer supported cooperative work CSCW The papers were chosen for their breadth of coverage of the field their clarity of expression and presentation their excellence in terms of technical innovation or behavioral insight their historical significance and their utility as sources for further reading Taken as a whole the papers and their introductions are a complete sourcebook to the field This book will be useful for computer professionals involved in the development or purchase of groupware technology as well as for researchers and managers It should also serve as a valuable text for university courses on CSCW groupware and human computer interaction

Recent Advances in Information and Communication

Technology Sirapat Boonkrong, Herwig Unger, Phayung Meesad, 2014-04-12 Computer and Information Technology CIT are now involved in governmental industrial and business domains more than ever. Thus it is important for CIT personnel to continue academic research to improve technology and its adoption to modern applications. The up-to-date research and technologies must be distributed to researchers and CIT community continuously to aid future development. The 10th International Conference on Computing and Information Technology IC 2 IT2014 organized by King Mongkut's University of Technology North Bangkok KMUTNB and partners provides an exchange of the state-of-the-art and future developments in the two key areas of this process: Computer Networking and Data Mining. Behind the background of the foundation of ASEAN it becomes clear that efficient languages, business principles and communication methods need to be adapted, unified and especially optimized to gain a maximum benefit to the users and customers of future IT systems.

Methods for Evaluating Interactive Information Retrieval Systems with Users Diane Kelly, 2009 Provides an overview and instruction on the evaluation of interactive information retrieval systems with users.
