**Working in the Wings** Elizabeth A. Osborne, Christine Woodworth, 2015-04-27 Theatre has long been an art form of subterfuge and concealment Working in the Wings New Perspectives on Theatre History and Labor edited by Elizabeth A Osborne and Christine Woodworth brings attention to what goes on behind the scenes challenging and revising our understanding of work theatre and history Essays consider a range of historic moments and geographic locations from African Americans performance of the cakewalk in Florida's resort hotels during the Gilded Age to the UAW Union Theatre and striking automobile workers in post World War II Detroit to the struggle in the latter part of the twentieth century to finish an adaptation of Moby Dick for the stage before the memory of creator Rinde Eckert failed Contributors incorporate methodologies and theories from fields as diverse as theatre history work studies legal studies economics and literature and draw on traditional archival materials including performance texts and architectural structures as well as less tangible material traces of stagecraft Working in the Wings looks at the ways in which workers identities are shaped influenced and dictated by what they do the traces left behind by workers whose contributions have been overwritten the intersections between the sometimes repetitive and sometimes destructive process of creation and the end result the play or performance and the ways in which theatre affects the popular imagination This collected volume draws attention to the significance of work in the theatre encouraging a fresh examination of this important

subject in the history of the theatre and beyond      **Crisis of Transcendence** J. Sage Elwell, 2010-12-23 From the Internet to the iPhone digital technology is no mere cultural artifact It affects how we experience and understand our world and ourselves at the deepest levels it is a fundamental condition of living The digitization of modern life constitutes an essential field of religious concern because it impacts our individual and cultural sensibilities so profoundly Despite this it has yet to be thematized as the subject of religious or theological reflection The Crisis of Transcendence remedies this by asking a single significant question How is digital technology impacting the moral and spiritual depth of culture How can something as ineffable and nebulous as the depth of culture be known and articulated let alone critiqued Author J Sage Elwell suggests that an answer lies in the arts The arts have historically acted as a barometer of the depth of culture reflecting the spiritual impulses and inclinations at the heart of society He argues that if the arts matter at all they will illuminate more than themselves Through an experimental interpretation of digital art Elwell offers a critical reflection on how digital technology is changing us and the world we live in at a level of religious significance Employing a theological aesthetic of digital art this book shows how the advent of digital technology as a revolutionary cultural medium is transforming the ways we think about God the soul and morality

**Post Critical Museology** Andrew Dewdney, David Dibosa, Victoria Walsh, 2013-01-25 Post Critical Museology considers what the role of the public and the experience of audiences means to the everyday work of the art museum It does this from the perspectives of the art museum itself as well as from the visitors it seeks Through the analysis of material gathered from a major collaborative research project carried out at Tate Britain in London the book develops a conceptual reconfiguration of the relationship between art culture and society in which questions about the art museum's relationship to global migration and the new media ecologies are examined It suggests that whilst European museums have previously been studied as institutions of collection heritage and tradition however modern their focus it is now better to consider them as distributive networks in which value travels along transmedial and transcultural lines Post Critical Museology is intended as a contribution to progressive museological thinking and practice and calls for a new alignment of academics and professionals in what it announces as post critical museology An alignment that is committed to rethinking what an art museum in the twenty first century could be as well as what knowledge and understanding its future practitioners might draw upon in a rapidly changing social and cultural context The book aims to be essential reading in the growing field of museum studies It will also be of professional interest to all those working in the cultural sphere including museum professionals policy makers and art managers
