Robert Bailey,2025-05-30 This study provides a new interpretation of art after modernism by foregrounding the importance of conceptual thinking as a pervasive force for change in art and art history since 1950 Robert Bailey shows how distinctions between art and art history gave way as conceptual thinking provided artists and art historians with a common means to reassess what art could be and do in the world Bailey assesses the results of artful and scholarly inquiries combining creative activity with intellectual rigor to proffer new approaches to a variety of social and environmental concerns ranging from questions about human identity including race class gender and sexuality to activist efforts to redress everything from abortion access to migrants rights to climate change This book provides both a historical overview of these developments and close analyses of key works and texts spanning 1950 to the present and encompassing broad geographic scope with special attention paid to Indigenous art The book will be of interest to scholars working in art history and contemporary art

Cities and Cultures Malcolm Miles,2007-04-26 Cities and Cultures is a critical account of the relations between contemporary cities and the cultures they produce and which in turn shape them The book questions received ideas of what constitutes a city s culture through case studies in which different kinds of culture the arts cultural institutions and heritage distinctive ways of life are seen to be differently used in or affected by the development of particular cities The book does not mask the complexity of this but explains it in ways accessible for undergraduates The book begins with introductory chapters on the concepts of a city and a culture the latter in the anthropological sense as well as denoting the arts citing cases from modern literature The book then moves from a critical account of cultural production in a metropolitan setting to the idea that a city too is produced through the characteristic ways of life of its inhabitants The cultural industries are scrutinised for their relation to such cultures as well as to city marketing and attention is given to the European Cities of Culture initiative and to the hybridity of contemporary urban cultures in a period of globalisation and migration In its penultimate chapter the book looks at incidental cultural forms and cultural means to identify formation and in its final chapter examines the permeability of urban cultures and cultural forms Sources are introduced positions clarified and contrasted and notes given for selective further reading Playing on the two meanings of culture Miles takes a unique approach by relating arguments around these meanings to specific cases of urban development today The book includes both critical comment on a range of literatures being a truly inter disciplinary study and the outcome of the author s field research into urban cultures *On the Anarchy of Poetry and Philosophy* Gerald L. Bruns,2006 This book takes seriously the transformation of art into philosophy focusing upon the systematic interest that so many European philosophers take in modernism Among the philosophers Gerald Bruns discusses are Theodor W Adorno Maurice Blanchot Arthur Danto Stanley Cavell Hans Georg Gadamer Michel Foucault Gilles Deleuze and Felix Guattari Jacques Derrida Jean Jean Fran ois Lyotard Jean Luc Nancy Philippe Lacoue Labarthe and Emmanuel Levinas As Bruns demonstrates the difficulty of much modern and contemporary poetry can be

summarized in the idea that a poem is made of words not of any of the things that we use words to produce meanings concepts propositions narratives or expressions of feeling Many modernist poets have argued that in poetry language is no longer a form of mediation but a reality to be explored and experienced in its own right **Experimental Animation** Miriam Harris,Lilly Husbands,Paul Taberham,2019-01-30 Experimental Animation From Analogue to Digital focuses on both experimental animation s deep roots in the twentieth century and its current position in the twenty first century media landscape Each chapter incorporates a variety of theoretical lenses including historical materialist phenomenological and scientific perspectives Acknowledging that process is a fundamental operation underlining experimental practice the book includes not only chapters by international academics but also interviews with well known experimental animation practitioners such as William Kentridge Jodie Mack Larry Cuba Martha Colburn and Max Hattler These interviews document both their creative process and thoughts about experimental animation s ontology to give readers insight into contemporary practice Global in its scope the book features and discusses lesser known practitioners and unique case studies offering both undergraduate and graduate students a collection of valuable contributions to film and animation studies **The Visual Music Film** Aimee Mollaghan,2016-01-23 Adopting an interdisciplinary approach The Visual Music Film explores the concept and expression of musicality in the visual music film in which visual presentations are given musical attributes such as rhythmical form structure and harmony **How Alternative is Alternative?** Matthew M.
