Living Electronic Music Simon Emmerson, 2007

Drawing on recent ideas that explore new environments and the changing situations of composition and performance Simon Emmerson provides a significant contribution to the study of contemporary music bridging history aesthetics and the ideas behind evolving performance practices Whether created in a studio or performed on stage how does electronic music reflect what is live and living What is it to perform live in the age of the laptop Many performer composers draw upon a library of materials but others refuse to abandon traditionally created and structured electroacoustic work Lying behind this maelstrom of activity is the perennial relationship to theory that is ideas principles and practices that somehow lie behind composers and performers actions The relationship of the body performing to the spaces around has also undergone a revolution as the source of sound production has shifted to the loudspeaker Emmerson considers these issues in the framework of our increasingly acousmatic world in which we cannot see the source of the sounds we hear

music has shifted from what seemed for a time to be a relatively clear and stable definition. In the field and the academy, lively debates around the definition and or value of virtuosity have always elicited strong and varied ideas. In the twenty first century, frictions have emerged between traditional definitions of virtuosity and contemporary practices that emphasise collaboration and blur roles between performers, composers and improvisers. Contemporary Musical Virtuosity embraces the evolving processes, practitioners and presentation models within twenty first century art music. This edited collection explores recent insights into the experience and role of virtuosity in different contexts via contributions from an intergenerational group of artists, academics and artist academics. Their writing highlights current themes in contemporary western art music and intersecting musical and performing arts genres such as dance, sound art, improvisation, jazz, trans-traditional collaborations and Australian Indigenous music. It offers models for supporting and recognising a plurality of musical virtuosity, typically excluded from traditional definitions, and examines implications for musical practice today. Chapters take the form of academic essays, artist reflections, interviews, personal letters and a manifesto reflecting the range of approaches and contexts covered. The collection includes first writings on practices that have been present in the industry for some time, not yet documented or examined in detail until now, and thus offers a vision for the future that prioritises inclusive and overlapping practices and processes in music.
