The first book to offer a complete introduction to the recorder includes basic reference material previously unavailable in one volume A special feature is the rich collection of illustrations which in themselves provide a history of the instrument **The Flute Book** Nancy Toff,1996 Divides flute music into eras such as the baroque classic romantic and modern traces its development in countries such as France Italy England Germany Spain the United States Great Britain by regions such as eastern and western Europe and in cities such as Paris and Vienna Includes appendices listing flute manufacturers repair shops sources for flute music and books and flute clubs and related organizations worldwide **Advanced Recorder Technique** Gudrun Heyens,2020-10-22 This technical volume is addressed to advanced treble recorder players looking for repertoire that is suited for consistent work on the foundations of their instrumental and musical abilities In accordance with the original literature for the treble recorder the exercises are mainly tailored to this instrument Some technical chapters can be practised on both the treble and descant recorder with transposed fingering The term technical must not be misunderstood here ultimately the exercises aim at artistic expression emotion and tonal interpretation **Old In Art School** Nell Painter,2019-08-27 A New York Times Book Review Editor s Choice Finalist for the National Book Critics Circle Award A Princeton professor turned artist recounts her late in life career change in this feisty and delightfully irreverent memoir about art and coming of age in your 60s Boston Globe A glorious achievement a cup of courage for everyone who wants to change their lives Tayari Jones author of An American Marriage Following her retirement from Princeton University celebrated historian Dr Nell Irvin Painter surprised everyone in her life by returning to school in her sixties to earn a BFA and MFA in painting In Old in Art School she travels from her beloved Newark to the prestigious Rhode Island School of Design finds meaning in the artists she loves even as she comes to understand how they may be undervalued and struggles with the unstable balance between the pursuit of art and the inevitable sometimes painful demands of a life fully lived How are women and artists seen and judged by their age looks and race What does it mean when someone says You will never be an artist Who defines what an artist is and all that goes with such an identity and how are these ideas tied to our shared conceptions of beauty value and difference Bringing to bear incisive insights from two careers Painter weaves a frank funny and often surprising tale of her move from academia to art in this glorious achievement bighearted and critical insightful and entertaining This book is a cup of courage for everyone who wants to change their lives Tayari Jones author of An American Marriage Advanced Recorder Technique Gudrun Heyens,2020-10-22 Advanced Recorder Technique is intended for advanced players of the alto recorder who are seeking rigorous practise material for developing their instrumental and musical skills The aim is that within the purely technical material the player will be able to discover and transform the musical parameters of sound movement tension relaxation and from that learn to deal musically with the individual technical elements scales arpeggios trills etc In accordance with the requirements of the recorder s original literature the exercises are intended mainly for the alto recorder However numerous recent arrangements of early baroque violin music for soprano

recorder which have become an established part of the repertoire have necessitated the serious treatment of this instrument too. A number of the chapters can therefore be played not only on the alto but transposed for the soprano recorder as well. The term technique should not be misunderstood: the objectives of the exercises are musical expression, inspiration, emotion and creative note shaping. This two-volume method deals with four aspects of recorder playing: finger and tonguing technique as well as breathing and sound production.

Music as Concept and Practice in the Late Middle Ages Reinhard Strohm, Bonnie J. Blackburn, 2001. Music as Concept and Practice in the Late Middle Ages is an entirely new addition to the New Oxford History of Music series, rather than a revision of the volume's predecessor published in 1960. It takes account not only of the developments in late medieval music scholarship during the latter decades of the twentieth century but also of the experience gained through significant changes in the

performance practice of the late medieval repertory witnessed during this period All the chapters include areas of discussion whose coverage in the series hitherto has been either wholly lacking or at best marginal Muslim and Jewish musical traditions of the Middle Ages late medieval office chant medieval dance music musical instruments in society music in Central and Eastern Europe music theory of the fourteenth and fifteenth centuries music and early Renaissance humanism The first chapter and the last three present the conceptualization of music in speculative theory philosophy compositional and didactic practice and musical historiography Four chapters and part of the first illustrate important musical repertoires and genres as they were developed within diverse societies The eight authors all of them with a long standing interest in their respective subjects have created through their collaboration a blend of mature scholarship and original investigation The volume's novelty of approach and content is complemented by a firm anchorage in the specialist literature and documentary source material Today no single view of the Middle Ages can be acceptable to the musician or to the historian The present volume which addresses itself to both provides solid information on formerly marginal themes and advocates further exploration of the other Middle Ages
