Art Surgery And Transplantation:

Art, Surgery and Transplantation Roy Calne, 1996-01-01 Professor Sir Roy Calne is recognized as one of the world's leading transplant surgeons. He is also a gifted artist. He has played an influential role in the development of transplantation surgery and has pioneered the use of the two main drugs used to prevent graft rejection. He now heads one of the leading transplant centres in the world and actively campaigns to increase public awareness of the benefit of transplantation techniques. This volume describes Professor Calne's experiences in the field of transplantation, how art affects the work of a surgeon, and the perspectives of the transplant patient and donor. The text is illustrated with many paintings depicting all aspects of transplant surgery. *Surgical Revolutions: A Historical And Philosophical View* Luis H

Toledo-pereyra, 2011-07-08 Many surgical revolutions distinguish the history and evolution of surgery. Some are small, others more dominant, but each revolution improves the art and science of surgery. Surgical revolutionaries are indispensable in the conception and completion of any surgical revolution, initiating scientific and technological advances that propel surgical practice forward. Surgical revolutionaries can come in the guises of Lister, antiseptics, Halsted, surgical residency, and safe surgery, Cushing, safe brain surgery, Wangensteen, gastrointestinal physiological surgery, Blalock, relief of cyanotic heart disease, Lillehei, open heart surgery, and many others. With the hindsight of history, we can recognize patterns of progress, evaluate means of advancing new ideas, and solidify details of innovative behavior that could lead to new surgical revolutions. This volume examines the following vital questions in detail: What is a surgical revolution, and how do we recognize one? Are surgical revolutionaries different? Is there a way to educate new surgical revolutionaries? Can history provide enduring examples of surgical revolutions? Are there different kinds of surgical revolutions? What characterizes a surgical revolution in the context of science and technology? What surgical revolutions are on the horizon? *Unveiling the History of*
