Architectural Exaptation Alessandro Melis, Telmo Pievani, Jose Antonio Lara-Hernandez, 2024-03-29 Architectural Exaptation When Function Follows Form focuses on the significance and the originality of the study of exaptation It presents exaptation as an opportunity to extend architectural design towards more sustainable approaches aimed at enforcing urban resilience The use of exaptation's definition in architecture supports the heuristic value of cross disciplinary studies on biology and architecture which seem even more relevant in times of global environmental crises This book aims to make a critique of the pre existing and extensive paternalistic literature Exaptation will be described as a functional shift of a structure that already had a prior but different function In architecture a functional shift of a structure that already had a function may apply to forms of decorative elements embedded in architectural components and to both change of function of tectonic elements and the change of use of an architectural space The book is illustrated with examples from around the globe including China Italy Mexico New Zealand the USA and the UK and looks at different civilizations and diverse historical periods ranging from the urban to the architectural scale Such examples highlight the potential and latent human creative capacity to change the use and functions something that cities and buildings could consider when facing disturbances Exaptation is shown as an alternative narrative to the simplifications of evolutionary puritanism It also offers an innovative perspective and presents an opportunity to re think the manner in which we design and redesign our cities This book will be of interest to architecture planning urban design and biology researchers and students Winner of the Gerd Albers Award 2024 This award is for the best book contribution in the field of Urban Planning and is awarded by International Society of City and Regional Planners ISOCARP

The Routledge Companion to Landscape Studies Peter Howard,Ian Thompson,Emma Waterton,Mick Atha,2013-02-15 Landscape is a vital synergistic concept which opens up ways of thinking about many of the problems which beset our contemporary world such as climate change social alienation environmental degradation loss of biodiversity and destruction of heritage As a concept landscape does not respect disciplinary boundaries Indeed many academic disciplines have found the concept so important it has been used as a qualifier that delineates whole sub disciplines landscape ecology landscape planning landscape archaeology and so forth In other cases landscape studies progress under a broader banner such as heritage studies or cultural geography Yet it does not always mean the same thing in all of these contexts The Routledge Companion to Landscape Studies offers the first comprehensive attempt to explore research directions into the many uses and meanings of landscape The Companion contains thirty nine original contributions from leading scholars within the field which have

been divided into four parts Experiencing Landscape Landscape Culture and Heritage Landscape Society and Justice and Design and Planning for Landscape Topics covered range from phenomenological approaches to landscape to the consideration of landscape as a repository of human culture from ideas of identity and belonging to issues of power and hegemony and from discussions of participatory planning and design to the call for new imaginaries in a time of global and environmental crisis Each contribution explores the future development of different conceptual and theoretical approaches as well as recent empirical contributions to knowledge and understanding Collectively they encourage dialogue across disciplinary barriers and reflection upon the implications of research findings for local national and international policy in relation to landscape This Companion provides up to date critical reviews of state of the art perspectives across this multifaceted field embracing disciplines such as anthropology archaeology cultural studies geography landscape planning landscape architecture countryside management forestry heritage studies ecology and fine art It serves as an invaluable point of reference for scholars researchers and graduate students alike engaging in the field of landscape studies
