Arthritis and Radioactivity Wade V. Lewis, Patricia Lewis, 1994 *Arthritis and Radioactivity* Wade V. Lewis, 1955

Radiobiology and Radiation Hormesis Charles L. Sanders, 2017-08-08 This book presents new information on radiobiology that more clearly refutes the linear no threshold LNT assumption and supports radiation hormesis. Fresh light is cast on the mechanisms of radiation hormesis and the potential benefits of low dose ionizing radiation in preventing and treating a wide variety of inflammatory and proliferative diseases. It is proposed that these effects may derive from cellular communication via electromagnetic waves directed by DNA with each cell acting as a quantum computer. Readers will also find close analysis of the negative impacts of radiophobia on many aspects of modern life including attitudes to imaging technologies, licensing of nuclear power reactors and preparedness for survival of nuclear war. The book will be of interest to researchers and scientists in radiobiology, radiation protection, health physics, medical physics and radiology. Specifically it will provide medical physicians, radiation oncologists, radiation epidemiologists, gerontologists, cell biologists, toxicologists and nuclear engineers with a wide range of interesting facts and enlightening novel perspectives.

National Library of Medicine Catalog National Library of Medicine (U.S.), 1960 Environmental Radon C. Richard Cothorn, James E. Smith Jr., 2013-11-21 This volume is intended for the professional who is a newcomer to the area of environmental radon. It marks the first time that chapters on these subjects have been brought together in a single volume and it is arranged so that anyone with some basic university level chemistry and physics can develop a clear understanding of the different aspects involved. The volume is intended to serve as a supplementary textbook in public health, environmental and health physics courses. It also can be used by the professional to get up to speed in this rapidly evolving field. The chapters are not necessarily a discussion of the latest research in this fast moving field but are intended to bring the reader to a level at which he can easily understand the current literature. At the back of this volume the reader will find the references for the individual chapters, a general list of reading materials, a glossary, an appendix describing the equations for radioactive decay for a series of progeny, a table of often used conversion factors and the addresses and brief biographies of the authors and editors. Both historical and SI International System units are used throughout the book to provide information for the widest range of readers.

The Mining West Richard E. Lingenfelter, 2003 This two volume set cites books, pamphlets, maps, music, directories and other published materials excluding materials from technical and popular magazines and newspapers on the history of mining in the American and Canadian West. Topics covered include prospecting, mining rushes and camps, and mining finance, labor, technology, law, literature and lore. The initial portion provides general information on mining and metallurgical technology. The subsequent regional sections are subdivided into refined historical studies, raw materials, fictional and poetic treatments, and bibliographical guides to further materials.
