Art of the Natural World Richard Rosenblum,2001 Essays by Valerie C Doran Richard Rosenblum Patricia Johanson and the Re-invention of Public Environmental Art, 1958-2010 Xin Wu,2013 Impeccably researched and richly detailed this book addresses the issue of translation between visual arts and landscape design in the 50 year career of American painter and environmental artist Patricia Johanson Exploring the artist s search for an art of the real as a member of the postwar New York art world it demonstrates that visual translation cannot be understood solely through the works of art instead attention must be paid to the process of creation This book is an insightful attempt to confront a crucial question in the history of art through the work of a contemporary artist The Chinese Taste in Eighteenth-Century England David Porter,2010-11-11 Eighteenth century consumers in Britain living in an increasingly globalized world were infatuated with exotic Chinese and Chinese styled goods art and decorative objects However they were also often troubled by the alien aesthetic sensibility these goods embodied This ambivalence figures centrally in the period s experience of China and of contact with foreign countries and cultures more generally David Porter analyzes the processes by which Chinese aesthetic ideas were assimilated within English culture Through case studies of individual figures including William Hogarth and Horace Walpole and broader reflections on cross cultural interaction Porter s readings develop new interpretations of eighteenth century ideas of luxury consumption gender taste and aesthetic nationalism Illustrated with many examples of Chinese and Chinese inspired objects and art this is a major contribution to eighteenth century cultural history and to the history of contact and exchange between China and the West Plane Image Gary Garrels,2006 Brice Marden A Retrospective ISBN 0 87070 446 X 978 0 87070 446 8 Hardcover 11 5 x 9 5 in 240 pgs 248 color U S 60 00 CDN 72 00 October Art Ecomysticism Carl von Essen,2010-10-19 Explores the philosophy science and spirituality of nature mysticism and its Green calling Offers a solid bridge between spiritual practice and environmental activism Reveals how we can heal the environment by renewing our connection to it Shows how spiritual encounters in nature are healing the Nature Deficit Disorder of our psyches and bodies Many have been struck by a majestic moment in nature a sole illuminated flower in a shady grove an owl swooping silently across a wooded path or an infinitely starry sky and found themselves in a state of expanded awareness so profound they can feel the interconnectedness of all life These trance like moments of clarity unity and wonder often incite a call to protect and preserve the earth to support Nature as she supports us Termed nature mysticism people from all cultures have described such experiences However the ever increasing urbanization of the world s population is threatening this ancient connection as well as the earth itself In Ecomysticism Carl von Essen explores nature mysticism through the recorded experiences of outdoor enthusiasts as well as scientific studies in biology psychology and neuroscience Citing consciousness scholar William James and a variety of well known nature lovers such as Ansel Adams Henry David Thoreau and Ralph Waldo Emerson von Essen shows how the spiritual transcendence from an encounter in

nature like other mystical experiences is healing the Nature Deficit Disorder of our psyches and bodies leading to an expansion of our worldview and a clearer understanding of our self and of our natural world Offering a solid bridge between spiritual practice and environmental activism von Essen s spiritual ecology reveals how only through a renewal of humanity s spiritual connection to nature can we effect true environmental healing    [Evocative Objects](#) Sherry Turkle,2011-09-30
