communication education and arts *Seed-ideas: Art of gestures and art of patterns* Dane Rudhyar,1928 All About Process Kim Grant,2017-02-28 In recent years many prominent and successful artists have claimed that their primary concern is not the artwork they produce but the artistic process itself In this volume Kim Grant analyzes this idea and traces its historical roots showing how changing concepts of artistic process have played a dominant role in the development of modern and contemporary art This astute account of the ways in which process has been understood and addressed examines canonical artists such as Monet C zanne Matisse and De Kooning as well as philosophers and art theorists such as Henri Focillon R G Collingwood and John Dewey Placing process art within a larger historical context Grant looks at the changing relations of the artist s labor to traditional craftsmanship and industrial production the status of art as a commodity the increasing importance of the body and materiality in art making and the nature and significance of the artist s role in modern society In doing so she shows how process is an intrinsic part of aesthetic theory that connects to important contemporary debates about work craft and labor Comprehensive and insightful this synthetic study of process in modern and contemporary art reveals how artists explicit engagement with the concept fits into a broader narrative of the significance of art in the industrial and postindustrial world *Aesthetics and the Environment* Allen Carlson,2005-08-08 Traditional aesthetics is often associated with the appreciation of art Allen Carlson shows how much of our aesthetic experience does not encompass art but nature in our response to sunsets mountains or horizons or more mundane surroundings like gardens or the view from our window He argues that knowledge of what it is we are appreciating is essential to having an appropriate aesthetic experience and that scientific understanding of nature can enhance our appreciation of it rather than denigrate it An Introduction to the Philosophy of Art Richard Eldridge,2003-09-25 Richard Eldridge presents a clear and compact survey of philosophical theories of the nature and significance of art Drawing on materials from classical and contemporary philosophy as well as from literary theory and art criticism he explores the representational expressive and formal dimensions of art and he argues that works of art present their subject matter in ways that are of enduring cognitive moral and social interest His accessible study will be invaluable to students and to all readers who are interested in the relation between thought and art Distributed, Ambient, and Pervasive Interactions Norbert Streitz,Constantine Stephanidis,2013-07-02 This book constitutes the refereed proceedings of the 5th International Conference on Distributed Ambient and Pervasive Interactions DAPI 2013 held as part of the 15th International Conference on Human Computer Interaction HCII 2013 held in Las Vegas USA in July 2013 jointly with 12 other thematically similar conferences The total of 1666 papers and 303 posters presented at the HCII 2013 conferences was carefully reviewed and selected from 5210 submissions These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems The papers accepted for presentation thoroughly cover the entire field of human computer interaction addressing major advances in knowledge and effective use of computers in a variety of

A New Approach to the Arts Peter Moore, 2024-07-09 This book considers how art actually works how the various art forms connect with the world of ordinary human experience Many books approach the subject from the top down through topics such as the nature of beauty the meaning of art aesthetic judgement and so on The present book examines the subject from the ground up so to speak showing how the creation and appreciation of art spring from innate human needs and capacities What we call the arts emerge organically from the habitual activities through which human beings represent the world to themselves and others Artistic representation always more than mere imitation is a reaching for the spirit of a subject a revealing of the implicit a refreshing of the overly familiar A key idea is that art is representation through convention that artistic conventions far from inhibiting the work of the artist are vital to artistic creativity

Musicking Christopher Small, 2012-01-01 Extending the inquiry of his early groundbreaking books Christopher Small strikes at the heart of traditional studies of Western music by asserting that music is not a thing but rather an activity In this new book Small outlines a theory of what he terms musicking a verb that encompasses all musical activity from composing to performing to listening to a Walkman to singing in the shower Using Gregory Bateson's philosophy of mind and a Geertzian thick description of a typical concert in a typical symphony hall Small demonstrates how musicking forms a ritual through which all the participants explore and celebrate the relationships that constitute their social identity This engaging and deftly written trip through the concert hall will have readers rethinking every aspect of their musical worlds
