Large deficit tibiotalocalcaneal (TLC) arthrodesis is a challenging procedure. The goal of this study was to evaluate the outcomes of a retrograde intramedullary nail (RAIN) with femoral head allograft for TLC arthrodesis. The RAIN database was created to collect data on patients who underwent this procedure. The database includes information on patient demographics, surgical technique, and clinical outcomes.

Arthrodesis In The Restoration Of Working Ability:

The Arthrodesis in the Restoration of Working Ability George Chapchal, H. Arbes, 1975 Arthrodesis in the Restoration of Working Ability George Chapchal, 1975-05-01 **Traumatic Disorders of the Ankle** W.C. Hamilton, 2012-12-06

The management of ankle injuries has long been a stumbling block for orthopaedists in training. As a first year resident I was fortunate to encounter the series of articles by N Lauge Hansen and T Baek Kristensen that classified ankle injuries according to their mechanism. I found this information quite helpful throughout my residency and early years of practice. Several years ago an attempt was made to summarize this material for the benefit of the orthopaedic house staff of Thomas Jefferson University. It quickly became obvious that such a manual would require a great deal of professional illustration and editorial assistance in order to be effective. Almost simultaneously a fortuitous encounter with Ms Marie Low at that time Medical Editor of Springer Verlag New York Incorporated provided both the stimulus and the means to present this information in the manner and detail which it deserved. Contributors were carefully selected for their knowledge and experience in particular areas and for their willingness to cooperate in providing a smooth flowing manuscript. This text contains little new material. Rather it represents an attempt to bring together under one cover the wealth of extant information on this subject. Wherever a consensus could not be perceived conflicting views have been summarized as objectively as possible. Unfortunately there are still many aspects of ankle injury for which we have more questions than answers.
