Camp, 2005-10-12 Recent scholarship on slavery has explored the lives of enslaved people beyond the watchful eye of their masters Building on this work and the study of space social relations gender and power in the Old South Stephanie Camp examines the everyday containment and movement of enslaved men and especially enslaved women In her investigation of the movement of bodies objects and information Camp extends our recognition of slave resistance into new arenas and reveals an important and hidden culture of opposition Camp discusses the multiple dimensions to acts of resistance that might otherwise appear to be little more than fits of temper She brings new depth to our understanding of the lives of enslaved women whose bodies and homes were inevitably political arenas Through Camp's insight truancy becomes an act of pursuing personal privacy Illegal parties frolics become an expression of bodily freedom And bondwomen who acquired printed abolitionist materials and posted them on the walls of their slave cabins even if they could not read them become the subtle agitators who inspire more overt acts The culture of opposition created by enslaved women's acts of everyday resistance helped foment and sustain the more visible resistance of men in their individual acts of running away and in the collective action of slave revolts Ultimately Camp argues the Civil War years saw revolutionary change that had been in the making for decades *Catalog of Copyright Entries. Paradigmatic Shifts in Geographical Thought Lalita Rana,2020-01-01 In advancing disciplines like Geography the methodological debate is a sign of health In Geography there has been extreme diversity of viewpoints on both philosophy and methodology with constant extension and also a shift in focus The methodology of geography came under debate for the first time during the middle of twentieth century when the paper published by F K Schaefer an American scholar brought both the qualitative and quantitative revolution in geographic development Shortly after this publication were discussed the paradigmatic shifts in a discipline by Thomas S Kuhn another American scholar through his seminal work in which he painted a picture of the development of science quite unlike that had gone before In order to elucidate this process of development of science Kuhn prepared a model termed as the Paradigm of Science Distinct parallels may be sought between the historical evolution of scientific discipline as explained by Thomas Kuhn and the historical evolution of the discipline of geography Seeking inspiration from the works of both of the great scholars mentioned above the present book examines the evolution of geographical thought from the perspective of Thomas Kuhn Two publications of mine 2008 2014 are on this line only However the methodological literature to understand the philosophical background making possible this disciplinary growth is too small The purpose here is to explore and screen the growth and development of Geography under sequential methodological changes over time in the light of various paradigmatic shifts with the acknowledgement of crises and revolutionary phases of development in the discipline

Accordingly the work identifies eight paradigmatic shifts intercepted by eight phases of crises in the discipline
