Beyond Legitimation Essays On The Problem Of Religious Knowledge:

Beyond Legitimation Donald Wiebe, 1994-01-01 *Beyond Legitimation* Donald Wiebe, 1973 The early essays in this volume proceed on the assumption that a compatibility system can be fashioned that will not only bring religious knowledge claims into harmony with scientific claims but will also show there to be a fundamental similarity of method in religious and scientific thinking They are not however unambiguously successful Consequently Wiebe sets out in the succeeding essays to seek an understanding of the religion science relationship that does not assume they must be compatible The examination in the final analysis reveals a fundamental contradiction in the compatibility system building programme which suggests that religious belief is beyond legitimation *Scientific Models for Religious Knowledge* Andrew Ralls Woodward, 2018-08-14 Most comparisons of science and religion are really comparisons of science and Christianity or science and Islam and so forth In *Scientific Models for Religious Knowledge* the author aims to get outside typical polarized debates between traditional a priori theism and radical scientific naturalism Instead a new science and religion compatibility system between a scientific study of religion and a religious epistemology is our new elusive problem Moreover we shall look at a comparison and contrast of modern science with the simple deference of the human mind to the actions of culturally postulated superhuman agents This book pays critical attention to the contributions of scholars in the philosophy of religion the philosophy of science and the scientific study of religion *Scientific Models for Religious Knowledge* is useful for readers looking to expand their learning in the philosophies of science and religion as these subjects are taught and analyzed in modern research universities

The Insider/Outsider Problem in the Study of Religion Russell T. McCutcheon, 1999-01-07 Thirty classic and contemporary readings from such writers as Kant Hume Schleiermacher and Otto to Ninian Smart Mircea Eliade Karen McCarthy Brown and Wendy Doniger **Beyond Legitimation** Donald Wiebe, 2016-01-01 The early essays in this volume proceed on the assumption that a compatibility system can be fashioned that will not only bring religious knowledge claims into harmony with scientific claims but will also show there to be a fundamental similarity of method in religious and scientific thinking They are not however unambiguously successful Consequently Professor Wiebe sets out in the succeeding essays to seek an understanding of the religion science relationship that does not assume they must be compatible That examination in the final analysis reveals a fundamental contradiction in the compatibility system building programme which more than suggests that religious belief knowledge is beyond legitimation **The Science of Religion: A Defence** Donald Wiebe, 2018-10-16 Donald Wiebe Professor of Philosophy of Religion at Trinity College University of Toronto has spent much of his academic career arguing for a clear demarcation between Theology and Religious Studies *The Science of Religion A Defence* offers a brilliant overview of Professor Wiebe's contributions on methodology in the academic study of religion of the development of his thinking over time and of his intellectual commitment to a science of religion The work is divided into three parts The first part identifies pertinent connections between religion religious studies and science and why

reductionism in the academic study of religion when properly applied can bridge the explanatory gap between the sceptic and the devotee The second part treats conceptual debates in the academic study of religion with particular reference to the place of belief understanding and meaning in the modern study of religion The third part addresses the theological resistance to the scientific study of religion and how that resistance can be overcome Finally two new essays are included a critique on The Preconceptions of a Science of Religion by Anthony J Palma and an accompanying reply by Donald Wiebe The Science of Religion A Defence is an essential resource for both scholarly and non scholarly audiences alike and will be of particular interest to both defenders and critics of a scientific study of religion **A Modest Proposal on Method** Russell T.

McCutcheon,2014-10-02 A Modest Proposal on Method further documents methodological and institutional failings in the academic study of religion This collection of essays which includes three previously unpublished chapters identifies the manner in which old problems like the presumption that our object of study is a special deeply meaningful case yet remain in the field But amidst the critique there are a variety of practical suggestions for how the science of religion can become methodologically even handed and self reflexive the markings of a historically rigorous exercise Each chapter is introduced and contextualized by a newly written substantive introduction Theology and Religious Studies in Higher Education

Darlene L. Bird,Simon G. Smith,2009-03-22 A collection of essays by some of today s leading academics on the sometimes contentious relationship between religious studies and theology *Failure and Nerve in the Academic Study of Religion*

William E. Arnal,Willi Braun,Russell T. McCutcheon,2014-09-11 Failure and Nerve in the Academic Study of Religion presents a provocative critique of the unwillingness of modern scholars to publically distinguish research into comparative religion from confessional studies written within denominationally affiliated institutions The book offers the 19th Century founders of the study of religion as a bracing corrective to contemporary timidity The issue was analysed and documented by Wiebe a quarter of a century ago Here marking Wiebe s work a wide range of contributors reassess the methodology and ambition of contemporary religious research The book argues that conceptualizing religion as part of the world of human action and experience is the first requirement of the study of religion Religious Philosophy as Multidisciplinary

Comparative Inquiry Wesley J. Wildman,2010-11-05 What can philosophy contribute to the study of religion This book argues that the study of religion needs philosophy in the form of multidisciplinary comparative inquiry Contradicting the current tendency to regard philosophical reflection and the academic study of religion as independent endeavors best kept apart Wesley J Wildman brings them together offering a broader vision than that of traditional philosophy of religion and surmounting many of its difficulties His newer conception of religious philosophy is well suited to the modern multicultural secular university Through multidisciplinary comparative inquiry religious philosophy allows for a variety of approaches from historical and analytical work to evocative description and theoretical evaluation of truth claims and both secular and religious thinkers participate The tasks and varieties of religious philosophy as they arc across the world s religions and

philosophies are discussed along with religious philosophy's modern and postmodern contexts Wildman's thoughtful and thought provoking book will be essential reading for all those concerned with the study of religion present and future

Past Minds Luther H Martin, Jesper Sørensen, 2016-06-16 How do historians understand the minds motivations intentions of historical agents What might evolutionary and cognitive theorizing contribute to this work What is the relation between natural and cultural history Historians have been intrigued by such questions ever since publication in 1859 of Darwin's *The Origin of Species* itself the historicization of biology This interest reemerged in the latter part of the twentieth century among a number of biologists philosophers and historians reinforced by the new interdisciplinary finding of cognitive scientists about the universal capacities of and constraints upon human minds The studies in this volume primarily by historians of religion continue this discussion by focusing on historical examples of ancient religions as well as on the theoretical promises and problems relevant to that study

Rationality and the Study of Religion Jeppe Sinding Jensen, Luther Martin, 2013-09-13 Does rationality the intellectual bedrock of all science apply to the study of religion Religion arguably the most subjective area of human behaviour has particular challenges associated with its study Attracting crowd healers conjurers the pious and the prophetic alongside comparativists and sceptics it excites opinions and generalizations whilst seldom explicitly staking out the territory for the discussions in which it partakes Increasingly scholars argue that religious study needs to define and critique its own field and to distinguish itself from theology and other non objective disciplines Yet how can rational techniques be applied to beliefs and states of mind regarded by some as beyond the scope of human reason Can these be made empirically testable or comparable and replicable within academic communities Can science explicate religion without reducing it to mere superstition or redefine its truth in some empirical but meaningful way Featuring contributions from leading international experts including Donald Wiebe Roger Trigg and Michael Pye *Rationality and the Study of Religion* gets under the surface of the religious studies discipline to expose the ideologies beneath Reopening debate in a neglected yet philosophically significant field it questions the role of rationality in religious anthropology natural history and anti scientific theologies with implications not only for supposedly objective disciplines but for our deepest attitudes to personal experience Interesting and important Religion has long been associated with irrationality both by its defenders and its critics and the topic of rationality has been unjustly neglected The book certainly deserves to be widely circulated Greg Alles Western Maryland College

Critical Faith Ronald A. Kuipers, 2021-11-15 Can religious faith be critical and remain recognizable as faith Or is the idea of a critical faith a contradiction in terms In this book an emerging new voice in the philosophy of religion argues in favor of critical faith Playing on a double meaning of the word critical the title of the book suggests that faith is not only a critical crucial component of human life but also a component that can and should develop in a critical intellectually vigilant way Taking John Locke's reflections on the relationship between faith and reason as his point of departure the author weaves his discussion around a wide array of intellectual figures and

conversations In addition to addressing important elements in the work of such historical figures as Aquinas and Locke Kuipers also incorporates themes from recent discussions in the philosophy of science feminist epistemology philosophy of language liberal theology and critical theory The book ends with a discussion of elements in Jurgen Habermas s theory of communicative action and offers a critical assessment of the merit of Habermas s notion of critical rationality as a normative yardstick for the achievement of a critical faith **The Routledge Companion to the Study of Religion** John R.

Hinnells,2005 The Routledge Companion to the Study of Religion contains everything a student needs for a full understanding of theory and methods in religious studies It begins by explaining the most important methodological approaches to religion including psychology philosophy anthropology and comparative study before moving on to explore a wide variety of critical issues Written entirely by renowned international specialists and using clear and accessible language throughout it is the perfect guide to the problems and questions found in courses and exams *Comparing Religions* Thomas Athanasius

Idinopulos,Brian C. Wilson,James Constantine Hanges,2018-08-14 Given the fact that today s university students are far more culturally sophisticated than ever before Comparing Religions Possibilities and Perils brings together a distinguished group of professors of religion with years of teaching experience to address the central question of how comparison of religions should be pursued in today s classroom Covering topics such as recent theoretical approaches to comparison case studies of comparing religions in the classroom and the impact of postcolonialism and postmodernism on the modernist assumptions of comparativism the volume seeks to problematize and interrogate the field especially as it relates to emerging models of pedagogy at the university level Comparing Religions will be of especial interest to those who teach in religious studies departments or who teach courses on religion in departments of anthropology sociology and history *The Routledge*

Companion to the Study of Religion John Hinnells,2005-06-21 Providing a genuinely full guide to the theory and methods related to religious studies this text written entirely by world renowned specialists is the ideal resource for those studying the discipline **Theological Ethics and Global Dynamics** William Schweiker,2008-04-15 The nature of ethics has been

the subject of much controversy and argument in recent decades Theological Ethics and Global Dynamics tackles these various debates offering a wide ranging comprehensive and provocative statement of the nature of theological ethics in global times Offers an accessible lively and provocative statement of the nature of moral philosophy and theological ethics in contemporary times Tackles various perspectives on debates about distinctly Christian ethics Argues that we need to reframe the arena in which moral questions are asked Engages a range of positions exploring distinctively modern issues such as moral and cultural relativism globalization problems of consumption and violence and religious pluralism Addresses the complexity of certain ethical decisions which are difficult and far from clear cut and yet presents an ethical understanding which is both humane and deeply religious **Index to Jewish Periodicals** ,1995 An author and subject index to selected
