Soaring Beyond Boundaries, 2007-01-01 Higher education systems in many countries are undergoing significant changes in response to variety of local national and international pressures Among these the shift from elitism to the provision of mass higher education increased impact of internationalization and globalization which are increasingly blurring national boundaries increased competition among universities for limited resources to support higher education sector the impact of technology and the knowledge economy and the continuing quest educational for equity Given what we already know about the position of women in the academy what is so significant about the account of women represented in this book Lessons from colleagues in Western universities provide important models for understanding some aspects of gendered identity of women scholars however a deeper understanding of educational experiences for women in countries such as China Turkey Iran Pakistan may potentially offer innovative insights to our current understanding of gender within education In this age of globalization there are common themes that transcend the experiences of women across very different social cultural economic and political

contexts Therefore accounts of women scholars represented in this volume demonstrate that the experiences women scholars are not isolated incidents but global phenomena and may offer alternative approaches to problems that seem insurmountable to women at the bottom of the professional ladder Further the experiences of non Western women scholars are important because it is only through an understanding of their educational conditions that institutions can implement policies and practices to respond effectively and to create work environments that are supportive to professional aspirations of these scholars Effective policies can only be attained when there is a clear understanding of the barriers and challenges female scholars Given that gender concerns especially in non Western countries have historically occupied and to some extent continue to occupy a marginal position in the daily operations of institutions of higher education it is critical to highlight their potentially harmful effects not only on women scholars but on institutions as well
