Sullenger, R. Steven Turner, 2015-05-07 Between 2004 and 2009 university educators practicing scientists museum and science centre personnel historians and K 12 teachers in Canada s eastern Atlantic provinces came together as a research community to investigate informal learning in science technology and mathematics The interdisciplinary collaboration known as CRYSTAL Atlantique was sponsored by Canada s National Science and Engineering Research Council In this volume the CRYSTAL participants look back on their collective experience and describe research projects that pushed the boundaries of informal teaching and learning Those projects include encounters between students and practicing scientists in university laboratories and field studies summer camps for science engagement after school science clubs for teachers and students innovative

software for computer assisted learning environmental problem solving in a comparative international context online communities devoted to solving mathematical problems and explorations of ethnomathematics among Canadian aboriginal peoples The editors and contributors stress the need for research on informal learning to be informed continuously by a notion of science as culture and they analyze the forms of resistance that studies of informal learning frequently encounter Above all they urge a more central place for informal science learning in the larger agenda of educational research today

The Cambridge Handbook of the Learning Sciences R. Keith Sawyer, 2005-04-24 Learning sciences is an interdisciplinary field that studies teaching and learning The sciences of learning include cognitive science educational psychology computer science anthropology sociology neuroscience and other fields The Cambridge Handbook of the Learning Sciences first published in 2006 shows how educators can use the learning sciences to design more effective learning environments including school classrooms and also informal settings such as science centers or after school clubs on line distance learning and computer based tutoring software The chapters in this handbook each describe exciting new classroom environments based on the latest science about how children learn CHLS is a true handbook in that readers can use it to design the schools of the future schools that will prepare graduates to participate in a global society that is increasingly based on knowledge and innovation
