Beyond Belief

Robert P. Vande Kappelle, 2012-09-17 The current age marks the transition from modernity to postmodernity a period as impactful to the Western sensibility as any previous era The role of religion and the future of Christianity are at stake At this time of transition many thoughtful individuals find themselves at a quandary having reached a critical stage in their spiritual journey Prompted by academia science reason culture and their own experience they feel compelled to choose between the beliefs they inherited as children and the claims of science reason pluralism and secularism *Beyond Belief* suggests that one need not take an either or approach on these issues there is a better way one that embraces adventure and ambiguity science and religion reason and faith evolution and creation and finds ways to live creatively with realities for which there are no easy explanations Building on a paradigmatic journey of faith that involves three stages precritical critical and postcritical understanding *Beyond Belief* describes the quest for God and for authentic faith in the twenty first century The key point for this understanding is to replace belief with faith acknowledging that belief in doctrines is not central since they are themselves unprovable This new theological perspective requires rethinking many of our cherished doctrines including our understanding of God Jesus Scripture prayer miracles and revelation

Beyond Belief Philip Stewart, 2014-09-24 How and why does faith so often fade away Where does it go and what do you hold on to when it is gone Between the believer and the unbeliever lies a sort of communicational void a cultural

gap usually marked by silence or alternatively by rage This extended essay draws on history literature and theology as well as personal experience in an attempt to give some kind of account of the demise of belief in terms that a believer can perhaps understand and in the process to cover some of the principal reasons why the arguments usually put forward to buttress faith prove to be without force In the end faith can enrich a persons life only at the expense of the illusions on which it is based

Crisp,2016-04-01 For much of the twentieth century professional social work sought to distance itself

from its religious origins with the consequence being that the role of spirituality in the lives of service users tended to be sidelined. Yet it is clear that many people begin to explore their spirituality precisely at times when they are trying to make sense of difficult life circumstances or experiences and may come into contact with social workers. In recent years there has been an increasing understanding that in order to be relevant to the lives of people they work with, social workers need to go beyond their material needs but there is little understanding of how spirituality can be sensitively incorporated into practice especially when either practitioners or service users have no religious affiliation or there is no shared religious background. In this pathbreaking volume Beth Crisp offers social workers ideas of beginning conversations in which spiritual values and beliefs may surface allowing service users to respond from their own framework and to begin to discuss the specific religious or spiritual practices and beliefs which are important to them. She considers spirituality in the context of lived experience a perspective that she argues breaks down any mystique and suspicion of explicitly religious language by focusing on language and experiences with which most people can identify. Such a framework allows exploration of issues that emerge at different stages in the lifespan both by persons who are religious and those who do not identify with any formal religion. Most literature on spirituality within social work refers to the elderly to those who are sick or have been bereaved yet as Crisp points out spirituality is important for people of all ages and not just at seemingly exceptional moments.

The Oxford Handbook of Religious Conversion Lewis Ray Rambo, Charles E. Farhadian, 2014. The Oxford Handbook of Religious Conversion offers a comprehensive exploration of the dynamics of religious conversion which for centuries has profoundly shaped societies, cultures and individuals throughout the world. Scholars from a wide array of religions and disciplines interpret both the varieties of conversion experiences and the processes that inform this personal and communal phenomenon. This volume examines the experiences of individuals and communities who change religions, those who experience an intensification of their religion of origin and those who encounter new religions through colonial intrusion, missionary work and charismatic and revitalization movements. The thirty-two innovative essays provide overviews of the history of particular religions including Hinduism, Buddhism, Confucianism, Taoism, Sikhism, Islam, Christianity, Judaism, indigenous religions and new religious movements. The essays also offer a wide range of disciplinary perspectives: psychological, sociological, anthropological, legal, political, feminist and geographical, on methods and theories deployed in understanding conversion and insight into various forms of deconversion.
