The (Second Edition) Unchanging God of Love Michael J Dodds, 2008 Much contemporary debate surrounds the traditional teaching that God is unchanging It is frequently argued that an immutable God must be cold remote indifferent and uncaring that an unchanging God cannot be the triune God of love revealed in Scripture Those who reject divine immutability often single out Thomas Aquinas as its most prominent proponent Unfortunately such critics of his theology frequently misunderstand the fundamentals of Aquinas's actual teaching The Unchanging God of Love provides a clear and comprehensive account of what Aquinas really says about divine immutability presented in a way that allows his theology to address contemporary criticisms The book first reviews the various ways Aquinas applies the notion of immutability to creatures showing that he is well aware of both the positive and negative implications of the concept It then analyzes all of his arguments for divine immutability that are presented in his writings noting his care in determining which aspects of immutability are to be affirmed and which are to be denied of God It also demonstrates the distinctiveness of Aquinas's teaching by examining the biblical patristic and philosophical sources he employs Aquinas's unchanging God proves to be no static deity but the dynamic trinitarian plenitude of knowledge love and life to whom not only immutability but also motion may in some way be attributed A study of the motion of the motionless God reveals how the concepts of both motion and immutability function in Aquinas's understanding of the Trinity the Incarnation Creation and Providence Through this study it becomes clear that the unchanging God of Aquinas far from being indifferent or remote is truly the God of compassion and love revealed in Scripture who shares a most intimate friendship

Issues in Bioethics and the Concept of Scale William Andrew Cook,2008 Issues in Bioethics and the Concept of Scale arose from the author s deep and committed interest in ecology moral philosophy and medicine and how they are interrelated William A Cook expands on the recognition that spatial and temporal scale characteristics are factors in the understanding and modeling of ecological systems and in decision making around ecological and environmental issues and introduces this dynamic to the field of bioethics The concept of scale from hierarchy theory as it is used in ecology to deal with the complexity and interrelationships of systems is explored and identified as a factor and potential source of conflict in the field of bioethics This notion of scale is conceptually useful for considering the complexity of some bioethical issues

Owen Barfield Michael V. Di Fuccia,2016-10-27 In this book Michael Di Fuccia examines the theological import of Owen Barfield s poetic philosophy He argues that philosophies of immanence fail to account for creativity as is evident in the false shuttling between modernity s active construal and postmodernity s passive construal of subjectivity In both extremes subjectivity actually dissolves divesting one of any creative integrity Di Fuccia shows how in Barfield s scheme the creative subject appears instead to inhabit a middle or medial realm which upholds one s creative integrity It is in this way that Barfield s poetic philosophy gestures toward a theological vision of poesis proper wherein creativity is envisaged as neither purely passive nor purely active but middle Creativity thus is not immanent but mediated a participation in being s primordial poesis

Society in its Challenges Santiago Sia,2014-03-17 Living in society has always presented a variety of challenges to its members These challenges need to be addressed if there is to be an improvement in the quality of life in society However to what extent can philosophical thinking facilitate the task This book pursues and answers this question It offers an analysis of fundamental issues and provides philosophical considerations of the challenges arising from living in society The topics discussed here include philosophy and the social context individual interests and the common good dualistic thinking of and in society relationships and communal life the individual and society ethical thinking and formation images reality and truth the power and limits of human freedom social roles public office and moral society economic crisis and accountability the marketplace academia education contemporary society and faith based education and the meaning and significance of life After reviewing these discussions the concluding chapter then sets out a philosophical vision to facilitate an understanding of and motivation for the creative advance of

society Love Alone Is Credible David L. Schindler, 2008-07-02 In this volume David L Schindler presents readers with a collection of essays garnered from the 2005 conference marking the centenary of Hans Urs von Balthasar's birth. That conference hosted an international gathering of scholars among them students, colleagues, friends and critics of Balthasar, all making an effort to engage the fundamental questions of faith and reason in light of his influential contribution to Catholic theology. A wide range of topics is explored in light of the Christian mystery including metaphysics and causality, the nature of rationality, the relationship between God and the world and the meaning of the body. Featuring an impressive list of contributors, *Love Alone Is Credible* is a tribute to the profound relevance of Balthasar's thought.

Bhakti - The Yoga of Love Samrat Schmiem Kumar, 2010 Transrational Peaces is a new approach in contemporary Peace Research. It considers the rational and the spiritual sphere of human perception to be essential for the understanding of peace. In this book the Austrian Indian researcher Samrat Schmiem Kumar presents the Indian tradition of Bhakti Yoga and demonstrates the value of Indian philosophy for contemporary discussions on peace. In the philosophy of Bhakti, life is a playful and aesthetic relationship between human and the cosmos. The book opens the field of Peace Studies beyond the well-known horizons of the discipline in Europe and the United States.

The Catholic Church and the World Religions Gavin D'Costa, 2011-04-28 There is no single standard textbook that outlines the official Roman Catholic theological position in relation to other religions, which then explicates this orientation theologically and phenomenologically in relation to the four main religions of the world and the flowering of new religious movements in the West. The present project will cover this serious gap in the literature. After outlining the teaching of Vatican II and the magisterium, since then, chapter one each subsequent chapter will be divided equally between a an exposition of the history and features of the religion or movement being studied and b a serious theological analysis of these features showing how these religions do have elements in common as well as how they differ in fundamental ways from Catholicism.

The Analogy of Being Thomas Joseph White, 2011 Does all knowledge of God come through Christ alone or can human beings discover truths about God philosophically? The Analogy of Being assembles essays by expert Catholic, Protestant and Orthodox theologians to examine the relationship between divine revelation in the person of Jesus Christ and the philosophical capacities of natural reason. These essays were inspired by the lively decades-long debate between Karl Barth and Erich Przywara, which was first sparked in 1932 when Barth wrote that the use of natural theology in Roman Catholic thinking was the invention of the Antichrist. The contributors to *The Analogy of Being* analyze and reflect on both sides of Barth and Przywara's spirited discourse, offering diverse responses to a controversy reaching to the very core of Christian faith and theology. It would be difficult to match the range and quality of commentators on this historic exchange between a Catholic philosopher and a renowned Reformed theologian on a subject of enduring significance given the centrality of analogy to any issue in philosophical theology. Moreover, the contributions exhibit how the issues have come to span ecclesial boundaries as their import has progressively evolved. A splendid collection. David Burrell C S C Uganda

Martyrs University A profound testimony to the enduring significance of the analogia entis debate between Erich Przywara and Karl Barth Hans Boersma Regent College In a fresh ecumenical context this extraordinary volume rekindles the mid twentieth century encounter between ressourcement thinkers and metaphysical theology The voices of Przywara Barth Balthasar and others speak anew through leading theologians of our own day in these masterfully orchestrated essays Matthew Levering University of Dayton

The God of Covenant and Creation Larry S. Chapp, 2013-05-01 According to Larry Chapp theology is left with two dire options in the aftermath of naturalism s apparent cultural triumph provide modernity with an intellectually cogent theological vision or perish along with that same culture in the wasteland of our nihilism Chapp s important book is grounds for hope that theology may live to see another day and that the pervasive nihilism may not have the last word He correctly diagnoses the intellectual and cultural dangers posed by so called scientific naturalism lifting the lid on its alleged metaphysical neutrality and exposing this naturalism for what it fundamentally is a bad theology which doesn t know itself And more importantly still he restores theology to its proper cosmological scope Not only does creation become intellectually compelling in Chapp s deft hands it elicits wonder and praise for its Creator and restores what is human in us This is a hopeful development indeed and a sign of an indispensable book Michael Hanby on back cover

Theology in the Public Square Gavin D'Costa, 2013-04-10 This imaginative study rethinks the nature of theology and its role in universities The author sketches out a fascinating project using examples from US and UK institutions whereby theology becomes a transformative force within universities Imagines what a Christian university in which all disciplines have been theologized would look like Feeds into discussions about the religious identity of denominationally linked colleges and universities Forms part of a wider attempt to imagine a vital public role for theology that enables it to serve both the Church and the wider community

The One Creator God in Thomas Aquinas and Contemporary Theology Michael J. Dodds, OP, 2020-08-21 This book provides a fundamental introduction to Aquinas s theology of the One Creator God Aimed at making that thought accessible to contemporary audiences it gives a basic explanation of his theology while showing its compatibility with contemporary science and its relevance to current theological issues Opening with a brief account of Aquinas s life it then describes the purpose and nature of the Summa Theologica and gives a short review of current varieties of Thomism Without neglecting other works it then focuses primarily on the discussion of the One God in the first part of the Summa Theologica God s transcendence and immanence is a recurrent theme in that discussion Evidence of God s immanent causality in the natural world grounds Aquinas s five arguments for the existence of God the Five Ways which then open onto God s transcendence The subsequent discussion of the divine attributes builds on the modes of God s causality established in the Five Ways It also shows the need for a language of analogy to preserve God s transcendence and prevent us from reducing God to the level of creatures even as qualities such as goodness and love which we first know from creatures are applied to God The discussion of God s providence and governance establishes that the transcendent Creator

God is most intimately present in creation God acts in all creatures in a way that does not diminish their proper causality but is rather its source As there is no contradiction between God's transcendence and immanence so there is no competition between the primary causality of God and the secondary causality of creatures Empirical science which is limited by its method to the secondary causality of creatures is shown to be compatible with the broader discipline of theology which also embraces the primary causality of the Creator

Being Holy in the World Nicholas J. Healy, D. C. Schindler, 2011 In *Being holy in the world* Nicholas Healy and D C Schindler presents the first book length study of David L Schindler's thought compiling essays by twelve scholars that examine Schindler's Trinitarian theology ecclesiology anthropology and metaphysics in the context of the encounter between Christianity and contemporary culture Page 4 of cover *Theology and the University* David Ray Griffin, Joseph C. Hough Jr., 1991-03-21 This book explores the relationship between theology and the modern university Most of the essays were written specifically for this volume and all of them are published here for the first time David Ray Griffin Gordon Kaufman Hans K ng Schubert Ogden and Wolfhart Pannenberg address the question of whether theology belongs in the university at all Essays by Joseph Hough Catherine Keller and Marjorie Suchoki argue that theology has a vital role in helping the university recover its central mission that of educating for the sake of the common good Thomas Altizer William Beardslee and Jack Verheyden provide historical analyses of the interactions between theology and the university with Altizer focusing on the modern divorce between faith and reason Beardslee on the relevance of the renewed emphasis upon rhetoric and Verheyden on the ideal of knowledge As a whole *Theology and the University* presents an impressive case against the position that theology is inappropriate in the university It argues not only that theology has a rightful place in the university but also that the university needs theology just as theology needs the university

Postmodernism and Christian Philosophy Roman Theodore Ciapalo, 1996-12-31 The contributors to *Postmodernism and Christian Philosophy* bring a wealth of philosophical insights and methodological approaches to bear on a common concern namely the possibility and extent of a fruitful dialogue between Christian philosophy and postmodern thought They tackle the timely question of how realism ought to respond to the threat to what Gilson called the Western Creed posed by modernity's heir apparent Enriched and invigorated by the insights of St Thomas Jacques Maritain Yves R Simon and others the articles assembled in this volume offer a provocative vision of the way in which a world bearing the imprint of modernity can nevertheless avoid succumbing to the false alternative proposed by postmodernism Contributors include Benedict M Ashley O P Don T Asselin Michael Baur David B Burrell C S C John Deely Curtis L Hancock Thomas S Hibbs Gregory J Kerr John F X Knasas Joseph W Koterski S J James L Marsh Matthew S Pugh Gregory M Reichberg Robert Royal James V Schall S J Rosalind Smith Edman Brendan Sweetman Joseph M de Torre Merold Westphal and Robert E Wood ABOUT THE EDITOR Roman T Ciapalo is associate professor of philosophy at Loras College in Dubuque Iowa

Margins of Reality Robert G. Jahn, Brenda J. Dunne, 2009-04 *WHAT HAS MODERN SCIENCE SWEPT UNDER THE RUG* This pioneering work which

sparked intense controversy when it was first published two decades ago suggests that modern science in the name of rigor and objectivity has arbitrarily excluded the role of consciousness in the establishment of physical reality Drawing on the results of their first decade of empirical experimentation and theoretical modeling in their Princeton Engineering Anomalies Research PEAR program the authors reach provocative conclusions about the interaction of human consciousness with physical devices information gathering processes and technological systems The scientific personal and social implications of this revolutionary work are staggering MARGINS OF REALITY is nothing less than a fundamental reevaluation of how the world really works The Implications of Determinism Roy Weatherford,2017-07-14 The problem of determinism arises in all the major areas of philosophy The first part of this book first published in 1991 is a critical and historical exposition of the problem and the most important ideas and arguments which have arisen over the many years of debate The second part considers the various forms of determinism and the implications that they engender *No God, No Science* Michael Hanby,2016-11-30 No God No Science Theology Cosmology Biology presents a work of philosophical theology that retrieves the Christian doctrine of creation from the distortions imposed upon it by positivist science and the Darwinian tradition of evolutionary biology Argues that the doctrine of creation is integral to the intelligibility of the world Brings the metaphysics of the Christian doctrine of creation to bear on the nature of science Offers a provocative analysis of the theoretical and historical relationship between theology metaphysics and science Presents an original critique and interpretation of the philosophical meaning of Darwinian biology
