From Hot War to Cold Jeffrey G. Barlow,2009-01-12 This book discusses the role of the U S Navy within the country s national security structure during the first decade of the Cold War from the perspective of the service s senior uniformed officer the Chief of Naval Operations and his staff It examines a variety of important issues of the period including the Army Navy fight over unification that led to the creation of the National Security Act of 1947 the early postwar fighting in China between the Nationalists and the Communists the formation of NATO the outbreak of the Korean War the decision of the Eisenhower Administration not to intervene in the Viet Minh troops siege of the French garrison at Dien Bien Phu and the initiation of the Eisenhower New Look defense policy The author relies upon information obtained from a wide range of primary sources and personal interviews with important senior Navy and Army officers The result is a book that provides the reader with a new way of looking at these pivotal events **European Security** Bjørn Møller,2016-04-22 Europe has undergone quite profound changes since the end of the Cold War Having been a highly militarised conflict ridden and war ridden region the core of Europe today constitutes a security community where armed conflicts among the constituent states

has become inconceivable This comprehensive book offers a theoretically founded and thoroughly documented analysis of European security with a special emphasis on the role played by the United Nations and the various regional and sub regional organisations especially the North Atlantic Treaty Organisation the Organisation for Security and Cooperation in Europe the Council of Europe and the European Union When it comes to explaining peace in Europe opinions differ widely Some argue that it was only because the West refused to give in to Soviet threats that the latter eventually gave up or that the long peace in Europe was due to the combination of a bipolar alliance structure pitting the North Atlantic Treaty Organisation NATO against the Warsaw Pact with the presence of nuclear weapons on both sides Others point instead to the extraordinarily dense network of international institutions and organisations in Europe offering a wide panoply of fora in which to handle disputes peacefully or to the web of interdependence in economic and other affairs tying together all states in Europe in relations which militate strongly against war Still others believe that the external peace between the states in Europe is simply a reflection of a convergence of cultures democracies with marked economies that are open towards the world market These questions are the focal point of this book which concentrates on security albeit not in the sense of being a treatise on military matters but security obtainable by much more indirect and non military means It will be required reading for all students and scholars of European security and the organisations which underpin it *Special Bibliography Series*, 1957

Nordenman, 2019-06-15 In this book Magnus Nordenman explores the emerging competition between the United States and its NATO allies and the resurgent Russian navy in the North Atlantic This maritime region played a key role in the two world wars and the Cold War serving as the strategic link between the United States and Europe that enabled the flow of reinforcements and supplies to the European Allies Nordenman shows that while a conflict in Europe has never been won in the North Atlantic it surely could have been lost there With Vladimir Putin's Russia threatening the peace in Europe following the annexation of Crimea in 2014 the North Atlantic and other maritime domains around Europe are once again vitally important But this battle will in many ways be different Nordenman demonstrates due to an overstretched U S Navy the rise of disruptive technologies a beleaguered NATO that woke up to the Russian challenge unprepared for high end warfighting in the maritime domain and a Russia commanding a smaller but more sophisticated navy equipped with long range cruise missiles Nordenman also provides a set of recommendations for what the United States and NATO must do now in order to secure the North Atlantic in this new age of great power competition *Norstad: Cold-War NATO Supreme Commander* NA NA, 2016-04-30 This book offers a biography of the most glamorous and powerful NATO Supreme Commander of the Cold War General Lauris Norstad as both a nuclear general and an international general His primary goal was to keep the Alliance together as he accommodated British and French nuclear ambitions while forestalling the same in West Germany He also

was at the center of the political military maneuverings over Berlin and the Soviet attempt to blackmail the West into recognizing East Germany all of which culminated in the building of the infamous Wall *NATO in the Post-Cold War Era* S. Papascoma, M. Heiss, 2016-04-30 Established in 1949 the North Atlantic Treaty Organization NATO performed its assigned mission exceedingly well as it secured peace for its member states and avoided military confrontation between the superpowers during the remaining four decades of the Cold War But with the dramatic changes that began in 1989 an identity crisis has plagued NATO Whereas the Cold War years had essentially defined who would be fighting whom in a future conflict the uncertain post 1989 years are introducing new and possibly calamitous variables Despite the fact that hardly a voice has been heard calling for its dissolution and that states from the former Warsaw Pact are seeking membership NATO's members face the demanding task of defining the new strategic challenges and formulating appropriate policies and responses The articles in this volume combine to present a comprehensive investigation of the diverse problems confronting NATO The contributions each provide relevant historical background before analyzing current conditions and projecting into the future An opening essay offers an overview of NATO after forty five years and is followed by others dealing with NATO's structural changes for the 1990s NATO's shifting strategy and NATO's developing connections with other international organizations such as the United Nations CSCE and the European Community The concluding part of the volume includes essays focusing on NATO's associations with the United States the Anglo American special relationship the Balkans the former Warsaw Pact states and the Middle East *Talking about Naval History* John B.
