Allocating Federal Funds For Science And Technology:

Allocating Federal Funds for Science and Technology National Research Council, National Academy of Engineering, National Academy of Sciences, Division on Engineering and Physical Sciences, Institute of Medicine, Committee on Criteria for Federal Support of Research and Development, 1995-11-22 The United States faces a new challenge maintaining the vitality of its system for supporting science and technology despite fiscal stringency during the next several years To address this change the Senate Appropriations Committee requested a report from the National Academies of Sciences and Engineering and the Institute of Medicine to address the criteria that should be used in judging the appropriate allocation of funds to research and development activities to examine the appropriate balance among different types of institutions that conduct such research and to look at the means of assuring continued objectivity in the allocation process In this eagerly awaited book a committee of experts selected by the National Academies and the Institute responds with 13 recommendations that propose a new budgeting process and formulates a series of questions to address during that process The committee also makes corollary recommendations about merit review government oversight linking research and development to government missions the synergy between research and education and other topics The recommendations are aimed at rooting out obsolete and inadequate activities to free resources from good programs for even better ones in the belief that science and technology will be at least as important in the future as they have been in the past in dealing with problems that confront the nation The authoring committee of this book was chaired by Frank Press former President of the National Academy of Sciences 1981 1993 and Presidential Science and Technology Advisor 1977 1981 Allocating Federal Funds for Science and Technology United States. In a world where advanced knowledge is widespread and low cost labor is readily available, U.S. advantages in the marketplace and in science and technology have begun to erode. A comprehensive and coordinated federal effort is urgently needed to bolster U.S. competitiveness and pre-eminence in these areas. This congressionally requested report by a pre-eminent committee makes four recommendations along with 20 implementation actions that federal policy makers should take to create high quality jobs and focus new science and technology efforts on meeting the nation's needs, especially in the area of clean, affordable energy:

1. Increase America's talent pool by vastly improving K-12 mathematics and science education.
2. Sustain and strengthen the nation's commitment to long-term basic research.
3. Develop, recruit, and retain top students, scientists, and engineers from both the U.S. and abroad.
4. Ensure that the United States is the premier place in the world for innovation.

Some actions will involve changing existing laws, while others will require financial support that would come from reallocating existing budgets or increasing them. *Rising Above the Gathering Storm* will be of great interest to federal and state government agencies, educators, and schools, public decision makers, research sponsors, regulatory analysts, and scholars. Guston, Daniel Sarewitz, 2007-02-01. With scientific progress occurring at a breathtaking pace, science and technology policy has never been more important than it is today. Yet there is a very real lack of public discourse about policy making, and government involvement in science remains shrouded in both mystery and misunderstanding. Who is making choices about technology policy, and who stands to win or

lose from these choices What criteria are being used to make decisions and why Does government involvement help or hinder scientific research Shaping Science and Technology Policy brings together an exciting and diverse group of emerging scholars both practitioners and academic experts to investigate current issues in science and technology policy Essays explore such topics as globalization the shifting boundary between public and private informed consent in human participation in scientific research intellectual property and university science and the distribution of the costs and benefits of research Contributors Charlotte Augst Grant Black Mark Brown Kevin Elliott Patrick Feng Pamela M Franklin Carolyn Gideon Ten N Hamilton Brian A Jackson Shobita Parthasarathy Jason W Patton A Abigail Payne Bhaven Sampat Christian Sandvig Sheryl Winston Smith Michael Whong Barr *Colleges of Agriculture at the Land Grant Universities* National Research Council, Board on Agriculture, Committee on the Future of the Colleges of Agriculture in the Land Grant University System, 1996-09-19 Since their inception in 1862 the U S land grant colleges have evolved to become the training ground for the nation's and the world's agriculturists In this book the committee examines the future of the colleges of agriculture in light of changing national priorities for the agricultural food and natural resource system The effects of federal funding constraints also are examined as are opportunities for growth presented by developments in science The committee's preceding volume *Colleges of Agriculture at the Land Grant Universities A Profile* is a compilation of the data that helped formulate the specific questions to be addressed *Colleges of Agriculture at the Land Grant Universities Public Service and Public Policy* is the deliberative report rating conclusions and recommendations for institutional innovation and public policy It addresses these and other questions What education mission should colleges of agriculture adopt and what strategies should they use in light of significant changes in the agricultural complex Research in agriculture is expected to respond to consumer demands environmental concerns world population growth and increasing pressure on agricultural lands Is the century old structure of land grant university based research up to the task What is the role of extension in light of today's smaller farming communities and larger farming conglomerates This volume is the culmination of a landmark evaluation of land grant colleges of agriculture an American institution This document will be of value to policymakers administrators and others involved in agricultural science and education Congressional Record United States.
