Almost Everything:

Nearly All and Almost Everything Mitzi DeWhitt, 2005-05-12 This musicological study by persuasive explanation shows how adhering to certain exact ratios and proportions music gains objective power The inquiry is scientific the solutions ingenious Following unexplored and unconventional lines the author brings together what on the surface appear to be three separate lines Judaism Hinduism and the Gurdjieff Work Their link is musical harmonics or the magical science of connection between sounds The failure of modern musicians to achieve the magical effects long ascribed to music by the ancients is due to the prevailing ignorance of those who know nothing about the objective laws on which music is based Ancient cultures knew how the laws of harmonics or what comes in between the tones could evoke metaphysical correspondences of a spiritual nature as did Gurdjieff The Hebrews encoded harmonics in their Tree of Life diagram the Hindus incorporated the potent musical information in a secretive Music of the Path and Gurdjieff enshrined it in the Enneagram symbol of the Work In this groundbreaking book the author presents a provocative and engaging picture of how these laws work The wealth of new information will have a profound impact on modern views of music and its laws

, **Circles and the Cross** Loren Wilkinson, 2023-08-21 Circles and the Cross is an invitation to explore two mysteries One is the miracle of the cosmos why is there something and not nothing The other is the miracle of consciousness why should this collection of stardust be an I and not just an it Our basic response to those mysteries is wonder and from wonder have grown the three great trees of human culture religion art and science This exploration is undertaken in the light of a third mystery the cross of Christ is the clearest picture we have of the triune Creator of both cosmos and consciousness That self emptying of the Creator out of love for the creation helps us understand the pleasures paradoxes and pains of science it helps us understand how evolution can be another name for creation it casts light on the Enlightenment and Romanticism In particular it illuminates the environmental movement an ethic in search of a religion Loren Wilkinson drawing on fifty years of teaching and writing about our relationship to creation invites you to join this journey into understanding how the cross of Christ sheds light on the mysteries that surround us and gives us hope in a difficult age *Emotionally Intelligent Batterer Intervention* Wendy W. Coates, 2017-01-26 During your treatment program think of yourself as a scientist who is

experimenting with different formulas to find the successful combination to reach your goals Most people have a patterned way of thinking and behaving If you are not comfortable with your current reality or you find that you are running into trouble then it s time to consider making a change A successful scientist won t continue to combine the same compounds and expect a different result During this program allow yourself to be a curious observer let go of judgment and practice a new way of being Messiah Pulpit ,1897 Contains text of sermons delivered by M J Savage and others in New York City

comes to the conclusion that we are likely to do more environmental damage by breaking free from carbon than if we embrace the impressive capacity that carbon based energy carriers and materials have for creating circular economies with zero net CO₂ emissions Biology has done this sustainably for 3.5 billion years and we must learn from that enormous lesson
