The Dark Precursor Paulo de Assis, Paolo Giudic, 2017-11-14 Deleuze's and Guattari's philosophy in the field of artistic research Gilles Deleuze's intriguing concept of the dark precursor refers to intensive processes of energetic

flows passing between fields of different potentials. Fleeting,ly used in *Difference and Repetition* it remained underexplored in Deleuze's subsequent work. In this collection of essays numerous contributors offer perspectives on Deleuze's concept of the dark precursor as it affects artistic research, providing a wide-ranging panorama on the intersection between music, art, philosophy and scholarship. The forty-eight chapters in this publication present a kaleidoscopic view of different fields of knowledge and artistic practices, exposing for the first time the diversity and richness of a world situated between artistic research and the philosophy of Gilles Deleuze and Félix Guattari. Within different understandings of artistic research, the authors—composers, architects, performers, philosophers, sculptors, film makers, painters, writers and activists—map practices and invent concepts contributing to a creative expansion of horizons, materials and methodologies.

Magic Lands John M. Findlay, 1993-09-22 The American West conjures up images of pastoral tranquility and wide open spaces, but by 1970 the Far West was the most urbanized section of the country. Exploring four intriguing cityscapes—Disneyland, Stanford Industrial Park, Sun City and the 1962 Seattle World's Fair—John Findlay shows how each created a sense of cohesion and sustained people's belief in their superior urban environment. This first book-length study of the urban West after 1940 argues that Westerners deliberately tried to build cities that differed radically from their eastern counterparts. In 1954 Walt Disney began building the world's first theme park using Hollywood's movie-making techniques. The creators of Stanford Industrial Park were more hesitant in their approach to a conceptually organized environment, but by the mid 1960s the Park was the nation's prototypical research park and the intellectual downtown for the high technology region that became Silicon Valley. In 1960 on the outskirts of Phoenix Del E Webb built Sun City, the largest most influential retirement community in the United States. Another innovative cityscape arose from the 1962 Seattle World's Fair and provided a futuristic, somewhat fanciful vision of modern life. These four became magic lands that provided an antidote to the apparent chaos of their respective urban milieus. Exemplars of a new lifestyle, they are landmarks on the changing cultural landscape of postwar America.

 Beatrice awakens after an eight hundred year sleep and travels throughout East Germany with the help of socialist trolley driver Laura Salman **Love in America** Francesca M. Cancian, 1990-08-31 In the last twenty five years Americans have gained considerable freedom in thier personal lives Relationships are now more flexible and self development has become a primary goal for both men and women Most scholars have criticized this trend to greater freedom arguing that it undermines family bonds and promotes selfishness and extreme independence Francesca Cancian is more optimistic In this book she shows that many American couples succeed in combining self development with commitment and that interdependence not independence is their ideal In interdependent relationships love and self development do not conflict but reinforce each other Love in America compares traditional forms of marriage with these newer forms of close relationships Starting with the nineteenth century Cancian shows how gender roles became polarized with love which was identified with emotional expression no practical help being the responsibility of women while self development was regarded as a masculine concern These traditional images of love and relationships are still held by many Americans today even though as Cancian points out this can lead to marital conflict and individual stress and illness By contrast new images of love emphasizing self development for men and women and flexible androgynous roles began to emerge around 1900 accelerating in the 1960s She concludes that this trend to self development and androgyny will continue but that whether it will lead to more interdependent relationships or to more independence and isolation depends partly on economic and political changes in the wider society The evidence for Cancian s argument comes from sociological historical and psychological sources Her book will interest readers in these disciplines as well s appeal to a wide general audience Stuck With The Bossy CEO YERB,
 What could go wrong in Mia s life if she got stuck on an island with her boss after a shipwreck Though Craig is good looking

smart sexy wealthy he is cold arrogant perfectionist bossy a bit of a jerk and engaged to his girlfriend Also he seeks revenge for something that Mia did to him eight years ago that she doesn't quite remember Craig is the only man on the island Will Mia think of him as her dream guy even if he has been so hard on her back in their workplace Can they resist the temptation of being alone together Well what could go wrong right *The Astronaut* Dario Llinares, 2011-05-25 The Astronaut Cultural Mythology and Idealised Masculinity interrogates the historical and cultural dynamics of one of the most revered icons of the 20th century Analysing a diverse range of cultural representations the book postulates the construction of an intertextual mythology through which the astronaut becomes an embodiment of American ideological values and heroic manhood The discursive processes at work in the range of media texts examined serve to embed the astronaut into the cultural imaginary as a largely coherent and uncontested exemplar of idealised masculinity Using a range of interdisciplinary analytical tools the book examines how the social construction of this masculine ideal iterates and naturalises gender hegemony The book situates the astronaut within the context of a modern postmodern theoretical framework linking shifts in gender perspectives to the contradictory narratives and characterisations that inform the mediation of the astronaut In so doing the book argues for a re-evaluation of the often oversimplified use of the term hegemonic masculinity as an anchoring point for the critique of masculinity The strength of this work is its interdisciplinary diversity and its interconnection of a range of themes including gender representation history ideology the postmodern and the media Drawing upon contemporary theoretical debates while redeploying seminal theoretical texts the book offers new cultural interrogations of a highly familiar historical subject
