Cross-cultural Perspectives on Families, Work, and Change Katja Boh, Giovanni B. Sgritta, Marvin B. Sussman, 1989

An intriguing study on families and their changing roles. Cross Cultural Perspectives on Families Work and Change provides fresh viewpoints on factors that have an impact on family life and relationships. This thematic volume with chapters from scholars in Italy, Australia, Israel, Jordan, West Germany, Yugoslavia, Norway, and Finland is truly international and covers a variety of substantive concerns. Among these is the concern for new familial models which will meld both the individual and the whole into a viable family entity capable of providing for the wishes, needs, and aspirations of the whole and individual members of a family. Discussing various concepts relating to family structure in lieu of the recent shift toward gender equity and the greater acceptance of varied forms of families and lifestyles, this book carefully links the most supportive and nurturing components of modern society with tried and true components of traditional cultures and systems. The chapters take a conceptual approach focusing on applications and future needs, policies, and problems surrounding the family. Cross Cultural Perspectives on Families Work and Change represents the increasing shift of mothers to professionals with chapters on increasing female employment and its effect on family life. The much needed search for explanations of family and society change and for new family models is a common thread throughout the book. In reading this insightful work, family and marriage counselors, students, and academicians in family studies, researchers, social workers, and psychologists will see new ways of perceiving families in their critical roles over generations of time.
