## **Alternative Military Strategies For The Future:**

**Alternative Military Strategies For The Future** Keith A. Dunn, 2019-03-04 In this volume prominent civilian and military experts in defense representing the maritime continental coalition military reform and noninterventionist schools of thought outline the changes in military strategy policy and force structure that they believe the United States must adopt if it is to cope successfully with threats to national security in the 1980s and 1990s The authors analyze US interests and objectives the changing strategic environment and the major security threats facing the United States in the coming decades They also discuss what they believe is the proper mix of political economic and military instruments for dealing with fixture threats The alternative strategies they present are wide ranging and comprehensive running the gamut from a strategic withdrawal from global commitments to proposals for increasing US power projection and forcible entry capabilities in the Third World In many ways the chapters are critical of current and past approaches to military strategy The authors believe it is essential that strategists understand the existing critiques of current U S military strategy in order to make the correct policy decisions for the future

**Alternative Conventional Defense Postures in the European Theater: The impact of political change on strategy, technology, and arms control** Hans Günter Brauch, Robert Kennedy, 1990 This volume examines NATO strategy and force posture alternatives in the light of changes that have taken place and which are taking place in Europe today The authors offer their views on the nature of political change changing military doctrines and changes in technology NATO s future role in the new Europe which is beginning to emerge in the post Cold War period is analyzed

*Parameters* , 1985 *Alternative Conventional Defense Postures In The European Theater* Hans G. Brauch, Robert F. Jr. Kennedy, 2018-10-24 First published in 1993 This volume edited jointly by the American strategic expert Robert Kennedy and the German peace researcher Hans Giinter Brauch takes up conceptual ideas developed by Horst Afheldt and Carl Friedrich von Weizsacker as well as others on both sides of the Atlantic since the 1960s Our aim has been to contribute to the development of concepts that would reduce the danger of a third world war by the creation of more stable structures in the context of a defensively oriented conventional defense posture In this volume a variety of alternative approaches to European conventional defense driven for the most part by similar strategic considerations are presented by German and American experts to a larger international audience

**Energy Abstracts for Policy Analysis** , 1987 **Strategic Doctrines and Their Alternatives** Yoshikazu Sakamoto, 1987 This book will give the reader a perspective into the core theory and practice of data mining and knowledge discovery DM KD Its chapters combine many theoretical foundations for various DM KD methods and they present an array of examples many of which are drawn from real life applications Most of the theoretical developments discussed are accompanied by an extensive empirical analysis which should give the reader both a deep theoretical and practical insight into the subjects covered The intended audience for this book includes graduate students studying data mining who have some background in mathematical logic and discrete optimization as well as researchers and

practitioners in the same area **BOOK JACKET** Strategic Horizons Steven Metz,1997 **Strategy, Forces and Budgets** Don M. Snider,1993 The successful application of national military strategy depends upon the existence of a balanced flexible military establishment a national force structured manned equipped and trained to execute the broad range of potential missions that exist in the post cold war world With this in mind the national leaders of the previous administration developed a concept for a military that was considerably smaller but well equipped highly trained and capable of rapid response to a number of probable scenarios in the final decade of the 20th century The author s masterful assessment of the processes by which these plans for the future state of America s armed forces were developed is a valuable addition to the literature on strategy formulation Working with a great deal of original source material he is able to illuminate the critical series of events that resulted in the development of the National Military Strategy of the United States and the base force He comments upon the roles played throughout this process by the Secretary of Defense by the Chairman of the Joint Chiefs of Staff and by the Service Chiefs He assesses the extent to which the build down has been achieved since the concept was approved and how the process was affected by the Gulf War domestic needs and to a lesser degree by a change in administrations Nuclear Weapons and the Atlantic Alliance United States. Department of the Army,1965 Charting the nation's course strategic planning processes in the 1952-53 "New Look" and the 1996-97 Quadrennial Defense Review Patrick M. Condray,2022 This study analyzes how the processes used in the national security planning influence the results It begins by discussing the nature of strategic planning for national security eventually defining it as a disciplined effort involving the allocation of resources to programmed activities aimed at achieving a set of objectives by integrating major goals policies and action sequences into a cohesive whole Two examples the New Look of 1953 and the Quadrennial Defense Review of 1997 are selected for comparison due to the many parallels of their respective historical situations The next step in the study defines several alternative methods for conducting strategic planning including how using those methods could influence the outcome These differences are used to analyze both the New Look and the Quadrennial Defense Review The New Look provides an example of a primarily sequential top down process while the Quadrennial Defense Review demonstrated the advantages and drawbacks of a primarily parallel process which had both top down and bottom up aspects The final section discusses the implications of the different approaches including the recommendation that any review contemplating major changes in national security policy follow a more sequential and top down process with clear guidance given to participants

**American Strategy: Issues and Alternatives For the Quadrennial Defense Review** Steven Metz,2022 U.S. Security, Arms Control, and Disarmament ,1961 **Options for Restructuring the Army** Adam Talaber,2005 The U S Army has seen its missions grow in number and intensity in recent years with the global war on terrorism and the invasion and occupation of Iraq The resulting levels of stress that have been placed on the Army s active and reserve components have generated public debate about whether the Army s present organization is adequate for the roles that the service is

playing now and will play in the foreseeable future At the same time the Army has begun an extensive restructuring effort called modularity that is designed to significantly alter how the service is organized and how it operates in the field This Congressional Budget Office CBO study prepared at the request of the House Committee on Armed Services examines the Army s capability to fight wars sustain long deployments and deploy rapidly to overseas operations as well as its dependence on personnel and units in the reserve component This study also analyzes eight options for restructuring the Army each of which would either increase the Army s ability to perform some types of missions or decrease its reliance on the reserve component The options offer a broad overview of the general types of policy choices and trade offs that decisionmakers will face when considering the size structure and capability of any plan for reorganizing the Army In keeping with CBO s mandate to provide impartial analysis this study makes no recommendations

Senate. Committee on Armed Services,1999 **Military Review** ,1986 **Conflict Termination And Military Strategy** Stephen J. Cimbala,2019-04-10 Although considerable attention has been paid to deterrence theory and crisis management the equally important topic of ending wars has been virtually ignored Conflict termination is the stepchild of U S strategy for a number of reasons Thinking about how wars should end presupposes acceptance of the fact that war especially nuclear war is possible Further analyzing options for ending conflicts implies less than total victory a concept that not only runs counter to the U S approach to warfare but also raises the specter of limited war an approach that fell into disfavor following Korea and Vietnam Finally defining conflict termination objectives assumes that we think more about ends than means that we know what is important to us and why and thus understand the risks we will accept to defend specific interests and objectives The contributors examine a wide variety of topics ranging from Soviet and U S views on conflict termination to past present and future U S military service contributions Their aim is to demonstrate the importance of careful evaluation of conflict termination goals during peacetime because when war begins passions and emotions will cloud decisionmaking *Future Survey Annual 1984* World Future Society,1984-06-01 *The U.S. Army in Asia, 2030-2040* Terrence K. Kelly,James Dobbins,David A. Shlapak,David C. Gompert,Eric Heginbotham,Peter Chalk,Lloyd Thrall,2014-08-22 Looking to the 2030 2040 time frame U S policy and military strategy will need to strike a balance among maintaining a cooperative relationship with China deterring Chinese aggression in regional disputes and preparing for the possibility that China could become more assertive The U S Army will have an important role to play in preparing for these developments and for protecting and furthering U S interests in the region
