familiar birds with renewed appreciation for their not so ordinary beauty and lifeways Beginning with the garishly colored male and the more gently colored female wood duck whose tree cavity nest serves as a launching pad for ducklings in the summer months and ending on a bright yellow note with the American goldfinch whose cheerful presence enlivens the midwestern landscape all year long Overcott combines field observations drawn from her twenty plus years of living and birding in Minnesota s Big Woods with anecdotes and data from other ornithologists to portray each species life cycle its vocalizations and appearance and its habitat food and foraging methods as well as migration patterns and distribution Infused with a dedication to conserving natural resources her succinct yet personable prose forms an ideal complement to Gardner s watercolors as this renowned illustrator of avian life worldwide revisits the birds of his childhood Together art and text ensure that the wild turkey great blue heron sharp shinned hawk barred owl pileated woodpecker house wren ovenbird field sparrow rose breasted grosbeak red winged blackbird and forty other species of the Upper Midwest are never seen as common again
