military history and naval strategy The Price of Victory N A M Rodger, 2024-10-24 The final instalment of N A M Rodger's definitive authoritative trilogy on Britain's naval history. At the end of the French and Napoleonic wars British sea power was at its apogee. But by 1840 as one contemporary commentator put it the Admiralty was full of intellectuals becalmed in the smoke of Trafalgar. How the Royal Navy reformed and reinvigorated itself in the course of the nineteenth century is just one thread in this magnificent book which refuses to accept standard assumptions and analyses. All the great actions are here from Navarino in 1827 won by a daringly disobedient Admiral Codrington to Jutland D Day the Battle of the Atlantic and the battles in the Pacific in 1944-45 in concert with the US Navy. The development and strategic significance of submarine and navy air forces is superbly described as are the rapid evolution of ships from classic Nelsonic type to hybrid steam sail ships then armour clad and the fully armoured Dreadnoughts and beyond and weapons. The social history of officers and men and sometimes women always a key part of the author's work is not neglected. Rodger sets all this in the essential context of politics and geo strategy. The character and importance of leading admirals Beatty Fisher Cunningham is assessed together with the roles of other less famous but no less consequential figures. Based on a lifetime's learning it is the culmination of one of the most significant British historical works in recent decades. Naval specialists will find much that is new here and will be invigorated by the originality of Rodger's judgements but everyone who is interested in the one of the central threads in British history will find it rewarding.

Sea Power Antony Preston, Louis S. Casey, 1979 An illustrated presentation of naval military history and evolution.

The Late Victorian Navy Roger Parkinson, 2008 A reappraisal of the late Victorian Navy the so called Dark Ages showing how the period was crucial to the emergence of new technology defined by steel and electricity. In purely naval terms the period from 1889 to 1906 is often referred to and indeed passed over as the pre Dreadnought era merely a prelude to the lead up to the First World War and thus of relatively little importance it has therefore received little consideration from historians a gap which this book remedies by reviewing the late Victorian Navy from a radically new perspective. It starts with the Great Near East crisis of 1878 and shows how its aftermath in the Carnarvon Commission and its evidence produced a profound shift in strategic thinking culminating in the Naval Defence Act of 1889 this evidence from the ship owners provides the definitive explanation of why the Victorian Navy gave up on convoy as the primary means of trade protection in wartime a fundamental question at the time. The book also overturns many assumptions about the era especially the perception that the navy was weak and clearly shows that the 1870s and early 1880s brought in crucial technological developments that made the Dreadnought possible.

decommissioning in 1992 and interviewed Desert Storm veterans still on board. Subsequently he talked to dozens of other men who served on the Missouri's crew during her long and illustrious history. Combining those interviews more than 100 altogether with records in the Naval Historical Center, National Archives, Harry S. Truman Library and other repositories, Stillwell has produced an engrossing portrait of the ship and her crew. Readers have a sense of being right on board as history was being made in World War II. They are also treated to an up-close view of the 1946 trip to the Mediterranean that planted the seed for the Sixth Fleet, President Truman's involvement with the ship, the Korean War, midshipman cruises, the warship's modernization in the 1980s after a long period in mothballs, an around-the-world cruise and finally her presence in the Persian Gulf. Among the many fascinating stories to be found here is the tale of a midshipman who gained a personal audience with Winston Churchill during a 1949 cruise to England; a crew member's description of winning a million-dollar state lottery; an account of President Truman's lifting the ban on drinking so he could enjoy his bourbon while visiting the Missouri; an explanation of why the ship just missed participating in the invasion of Inchon, Korea; and a Japanese participant's reaction to General Douglas MacArthur's speech at the surrender ceremony. Some 370 photographs enhance that narrative to give the reader a complete picture of the Mighty Mo.

Illustrated with 200 official admiralty photographs, many of them previously unpublished, this book traces the development of Royal Naval ship design in a period of immense change. Opening with the Crimean War, this period saw the gradual transition from sail to steam and screw propulsion, from wood to steel construction, from fixed broadside armaments of bronze muzzle loaders to turret-mounted steel breech loaders and torpedoes. The period covered in this volume closes with the launch of HMS Dreadnought, which overnight rendered all existing ships obsolete and signalled the start in earnest of the Anglo-German naval arms race which contributed to the outbreak of WW1. Each photograph is accompanied by full specifications where available and a caption detailing any significant design features, while the main text gives an overview of naval developments across the period under discussion, setting the selected ships in context.
