**Boccaccio's Naked Muse** Tobias Foster Gittes, 2008-04-05 Giovanni Boccaccio 1313 1375 experimented with such a wide variety of genres that critics have tended to focus more on the differences among his works than on their underlying similarities However a more comprehensive examination of his corpus reveals that concealed beneath this striking diversity of subject and genre there is a coherent mythology a virtual catalogue of innovative myths designed to more accurately reflect his cultural experience and better address the needs of his age Exploring the most significant of these myths emBoccaccio s Naked Muse em presents a writer who cast himself as the apostle of a new humanistic faith one that would honour God by exalting his creation Tobias

Foster Gittes argues that Boccaccio did not simply reproduce Golden Age schemes in his works. Rather, he subtly altered and adapted them in order to produce a model of human beatitude more suited to his conviction that cultural achievement and human dignity are indissolubly linked. Gittes critiques common conceptions of Boccaccio's passivity or his readiness to speak dismissively of his own work and to cast himself as a victim of vicious critics. Instead, Gittes shows that Boccaccio deliberately assumed this posture of passivity to align himself with a series of martyrs who like him had willingly suffered torments in the interest of cultural advancement. By venturing outside the Decameron to the Latin works and outside the usual textual and intertextual readings of Boccaccio to more broadly cultural and anthropological material, Boccaccio's *Naked Muse* offers fresh insights on this hugely significant literary figure and his lifelong campaign to transform mythological traditions into a gift for all humanity.

**Ego Development and Psychopathology** David Ausubel, 2018-01-18 Ego Development and Psychopathology presents an original theoretical underpinning for classification and interpretation of the major mental disorders, one based largely on the author's clinical experience. Ausubel's central thesis is that the most significant and crucial factors predisposing persons to mental disorders are critical developmental defects that arise at vital transitional phases of ego development. He sees both normal and pathological personality functioning as most cogently explained in terms of an individual's ego structure at a given point in the life cycle. Ausubel relates his developmental theory to the phenomenology and related clinical problems of psychiatric diagnosis. He classifies mental disorders in terms of their developmental history. Such factors, in his opinion, offer the most precise delineation of etiological, functional, and phenomenological similarities and differences among the various psychiatric syndromes. He provides an overview of ego development as well as major variants of the norm. He also discusses development of conscience and moral values as well as psychopathological considerations that follow from deficiencies, defects, failure, and distortions in ego development. He examines at length classification of mental disorders such as anxiety states, psychotic depression, and mania, schizophrenia, autism, antisocial, and narcissistic personality disorders, and defense mechanisms. Ausubel is careful to point out that ego development is not the only significant determinant of normal and aberrant personality. Genetic predispositions, situational stress, and sociocultural factors must always be taken into consideration, since mental disorder is always a product of multiple causality. However, he believes ego development is by far the most critical factor and hence offers the most for classification of mental illness. This intriguing study will be of interest to professionals as well as educated and concerned practitioners in the fields of psychology, psychiatry, psychoanalysis, child psychotherapy, and social work.
