Bittersweet 1st Edition:

Diabetes Arleen Marcia Tuchman, 2020-08-05 Who gets diabetes and why An in depth examination of diabetes in the context of race public health class and heredity Who is considered most at risk for diabetes and why In this thorough engaging book historian Arleen Tuchman examines and critiques how these questions have been answered by both the public and medical communities for over a century in the United States Beginning in the late nineteenth century Tuchman describes how at different times Jews middle class whites American Indians African Americans and Hispanic Americans have been labeled most at risk for developing diabetes and that such claims have reflected and perpetuated troubling assumptions about race ethnicity and class She describes how diabetes underwent a mid century transformation in the public s eye from being a disease of wealth and civilization to one of poverty and primitive populations In tracing this cultural history Tuchman argues that shifting understandings of diabetes reveal just as much about scientific and medical beliefs as they do about the cultural racial and economic milieus of their time

Monsters, Monstrosities, and the Monstrous in Culture and Society Diego Compagna, Stefanie Steinhart, 2020-01-28 Existing research on monsters acknowledges the deep impact monsters have especially on Politics Gender Life Sciences Aesthetics and Philosophy From Sigmund Freud s essay The Uncanny to Scott Poole s *Monsters in America* previous studies offer detailed insights about uncanny and immoral monsters However our anthology wants to overcome these restrictions by bringing together multidisciplinary authors with very different approaches to monsters and setting up variety and increasing diversification of thought as guiding patterns Existing research hints that monsters are embedded in social and scientific exclusionary relationships but very seldom copes with them in detail Erving Goffman s doesn t explicitly talk about monsters in his book *Stigma* but his study is an exceptional case which shows that monsters are stigmatized by society because of their deviations from norms but they can form groups with fellow monsters and develop techniques for handling their stigma Our book is to be understood as a complement and a further development of previous studies The essays of our anthology pay attention to mechanisms of inequality and exclusion concerning specific historical and present monsters based on their research materials within their specific frameworks in order to create engaging constructive critical and diverse approaches to monsters even utopian visions of a future of societies shared by monsters Our book proposes the usual view that humans look in a horrified way at monsters but adds that monsters can look in a critical and even likewise frightened way at the very societies which stigmatize them
