African American Children Shirley A. Black Children/white Children Zena Smith Blau, 1981 The basic object of this book is to identify the social processes that influence the development of intellectual competence in black children and white children in order to account for their difference in measured ability in the early years of schooling The results of my study provide strong evidence that the sources of these differences are social not genetic in origin Children Today , 1982 **Annual Progress in Child**

The Profile of American Youth R. Darrell Bock, 1984 **Child Welfare Revisited** Joyce Everett, Sandra Stukes Chipungu, Bogart R. Leashore, 2004 Why are there proportionally more African American children in foster care than white children Why are white children often readily adoptable while African American children are difficult to place Are these imbalances an indication of institutional racism or merely a coincidence In this revised and expanded edition of the classic volume Child Welfare twenty one educators call attention to racial disparities in the child welfare system by demonstrating how practices that are successful for white children are often not similarly successful for African American children Moreover contributors insist that policymakers and care providers look at African American family life and child development from a culturally based Africentric perspective Such a perspective the book argues can serve as a catalyst for creativity and innovation in the formulation of policies and practices aimed at improving the welfare of African American children Child Welfare Revisited offers new chapters on the role of institutional racism and economics on child welfare the effects of substance abuse homelessness HIV AIDS and domestic violence and the internal strengths and challenges that are typical of African American families Bringing together timely new developments and information this book will continue to be essential reading for all child welfare policymakers and practitioners **Teaching Diverse Populations** Etta R. Hollins, Joyce Elaine King, Warren C. Hayman, 1994-01-01 This book presents current knowledge about teaching culturally diverse populations traditionally underserved in the nation's public schools It approaches the challenge of improving public school education for these students in a variety of ways including relating of cultural and experiential knowledge to classroom instruction

Racial and Ethnic Disparities in Health and Health Care Elene V. Metrosa, 2006 It is generally conceded that there are significant disparities in health and health care based on a person's racial and ethnic background Infant mortality rates for black babies remain nearly two and one half times higher than for whites The life expectancy for black men and women remains at nearly one decade fewer years of life compared with their white counterparts Rates of death attributable to heart disease stroke prostate and breast cancer remain much higher in black populations Diabetes disease rates are more than 30 percent higher among Native Americans and Hispanics than among whites Minorities remain grossly under represented in the health professions workforce relative to their proportions in the population In addition despite a large and growing body of scientific evidence many patients and providers remain unaware that racial and ethnic health care disparities are a problem and perceptions about health care inequalities vary between minorities and whites closing the disparity gap This book presents new research focusing on these disparities
