done and reported on the many dimensions related to the epidemiology mechanism treatment and prognosis of child maltreatment. Efforts are being directed toward developing an evidence based approach to the prevention of child abuse and neglect. These are some of the positives. However, negatives exist and remain reasons for concern. Despite a tremendous amount of attention to the problem of maltreatment, there are at least 3 million reports of suspected child abuse and neglect made annually, with nearly 1 million cases being substantiated.

Oil and Gas Processing Equipment G. Unnikrishnan, 2020-09-14 Oil and gas industries apply several techniques for assessing and mitigating the risks that are inherent in its operations. In this context, the application of Bayesian Networks (BNs) to risk assessment offers a different probabilistic version of causal reasoning. Introducing probabilistic nature of hazards, conditional probability, and Bayesian thinking, it discusses how cause and effect of process hazards can be modelled using BNs and development of large BNs from basic building blocks. Focus is on development of BNs for typical equipment in industry, including accident case studies and its usage along with other conventional risk assessment methods. Aimed at professionals in oil and gas industry, safety engineering, risk assessment, this book brings together basics of Bayesian theory, Bayesian Networks, and applications of the same to process safety hazards and risk assessment in the oil and gas industry. Presents sequence of steps for setting up the model, populating the model with data, and simulating the model for practical cases in a systematic manner. Includes a comprehensive list on sources of failure data and tips on modelling and simulation of large and complex networks. Presents modelling and simulation of loss of containment of actual equipment in oil and gas industry, such as Separator, Storage tanks, Pipeline, Compressor, and risk assessments. Discusses case studies to demonstrate the practicability of use of Bayesian
