Alternative Educational Delivery Systems Janet Graden, Joseph E. Zins, Michael J. Curtis, 1988-01 **Promoting Executive Function in the Classroom** Lynn Meltzer, 2010-03-23 Accessible and practical this book helps teachers incorporate executive function processes such as planning organizing prioritizing and self checking into the classroom curriculum Chapters provide effective strategies for optimizing what K 12 students learn by improving how they learn Noted authority Lynn Meltzer and her research associates present a wealth of easy to implement assessment tools teaching techniques and activities and planning aids Featuring numerous whole class ideas and suggestions the book also shows how to differentiate instruction for students with learning or attention difficulties Case examples illustrate individualized teaching strategies and classroom accommodations More than a dozen reproducibles are included the large size format facilitates photocopying and day to day reference Purchasers also get access to a webpage where they can download and print the reproducible materials See also Meltzer s edited volume *Executive Function in Education Second Edition* which presents state of the art knowledge on the role of EF in learning across the content areas *Improving the Implementation of the Individuals with Disabilities Education Act* ,1996 **Interventions for Students with Learning Disabilities** H. Lee Swanson, 1999-04-23 The first comprehensive quantitative analysis of intervention research in the learning disabilities field this volume synthesizes the results of 272 scientifically credible group and single subject studies in an effort to identify what works best for learning disabled children The book examines pertinent findings on all academic cognitive and behavioral domains Intervention outcomes are evaluated across instructional domains sample characteristics intervention parameters methodological procedures and article characteristics Addressing such questions as the merits of inclusion settings and the relative benefits of direct and strategy instruction Swanson offers timely recommendations for instructional design assessment and policy *Behavior Change in the Classroom* Edward Steven Shapiro, Christine L. Cole, 1994-02-25 One of the primary goals of education is to ensure that children learn varied and complex self management skills to become more self assured more self reliant and responsible for their own behavior as well as to succeed academically Although learning experiences designed to actively teach self management techniques are usually directed toward children with severe academic and behavior problems these skills are also extremely beneficial for the general student population An excellent resource for school based practitioners who wish to address the needs of all school aged children and adolescents this book presents practical approaches for designing and implementing self management interventions in school settings

Integrated Lifecycle Services for Persons with Disabilities David L. Lovett, Kathryn A. Haring, 2012-12-06 The field of education is under pressure both external and internal to improve the services provided to all students In American society and elsewhere there is a concern that current educational practices fail to adequately prepare many students to be productive citizens There has been a call for educational services that are more responsive to the needs of students that use

effective educational practices that involve parents and the local community and that adequately prepare teachers to assume more professional roles Over the last several decades special educators have addressed these and other critical issues as they relate to students with disabilities The knowledge gained from these endeavors can be useful in the reshaping of schools for all students those with disabilities and those without Indeed this information may be useful for services beyond school whether for young children or adults This volume has been written to address how people with disabilities can be effectively served in settings with their nondisabled peers Because many of the students who are not well served by current educational practices have similar needs as students with disabilities it is anticipated that some of this information may be useful in the discussion regarding the reshaping of educational systems It is also anticipated that the material presented will help in the design of more effective coordinated systems that serve people with disabilities throughout their lives

Refocusing Educational Psychology Neville Jones, Norah Frederickson, 1990 This work is a follow up volume to *Management and the Psychology of Schooling* 1988 which looked at an alternative style of working for psychological services in the future From this starting point the present volume aims to be more precise about what a psychology of schooling entails

Identification of Learning Disabilities Renee Bradley, Louis Danielson, Daniel P. Hallahan, 2002-12-18 *Identification of Learning Disabilities Research to Practice* is the remarkable product of a learning disabilities summit conference convened by the Office of Special Education Programs OSEP in August 2001 and the activities following that summit Both the conference and this book were seen as important preludes to congressional reauthorization of the historic Individuals With Disabilities Education Act IDEA scheduled for 2002 and subsequent decision making surrounding implementation The OSEP conference brought together people with different perspectives on LD parents researchers

practitioners and policymakers and resulted in this book which examines the research on nine key issues concerning the identification of children with learning disabilities Coverage includes alternative responses to treatment classification approaches processing deficit models and approaches to decision making Chapter Structure Each of the first nine chapters is organized around a lengthy issue oriented paper which presents the most current research on that topic These primary papers are then followed by four respondent papers that reflect a variety of viewpoints on the topic Summarizing Chapter A small group of researchers listed in the final chapter dedicated an enormous amount of time to summarizing the research and developing key consensus statements regarding the identification of children with learning disabilities Their work is sure to have a tremendous impact on future discussions in this area Expertise The following well known scholars have helped summarize the vast amount of research presented in this book as well as the consensus statements derived therefrom Lynne Cook Don Deshler Doug Fuchs Jack M Fletcher Frank Gresham Dan Hallahan Joseph Jenkins Kenneth Kavale Barbara Keogh Margo Mastopieri Cecil Mercer Dan Reschley Rune Simeonsson Joe Torgesen Sharon Vaughn and Barbara Wise

Supporting the Whole Child: Reflections on Best Practices in Learning, Teaching, and Leadership Marge Scherer, 2009-11-23 This e book a collection of articles from Educational Leadership and other ASCD publications explores what it means to support the whole child In these articles authors ponder the various meanings of support in the classroom school and community This third in a four book series exploring whole child education ends by emphasizing another maxim of good teaching Hold high expectations for your students Our authors agree With the right supports students are capable of doing more than even they think they can Contemporary Special Education Research Russell Gersten, Ellen P. Schiller, Sharon R. Vaughn, 2000-03-01 Considerable research in the past 30 years has accumulated regarding the academic and social functioning of youngsters with disabilities Only in the past decade has there been sufficient special education research published from which meta analyses and syntheses can be conducted In this volume seven sets of authors grapple with synthesizing the knowledge base on an array of critical topics in the field of special education Among others specific chapters include a synthesis of what is known about effective instructional grouping practices for reading an examination of the differences between students classified as learning disabled and other low achieving students on a range of academic performance measures a review of effective instruction for English language learners an examination of the research on behavioral supports for low incidence special education populations a synthesis on how technology supports literary development across the full spectrum of disabilities categories These papers provide up to date informative summaries of current knowledge and a base from which further venture into the critical area of instructional intervention in special education can occur **Curriculum-based Measurement** Mark R. Shinn, 1989-03-17 Developed specifically to overcome problems with traditional standardized instruments curriculum based measurement CBM has steadily increased in educational use These brief assessment probes of reading spelling written expression and mathematics serve to quantify

student performance as well as to enhance academic achievement Their widening use as a means of evaluation and ultimately of instruction has created a corresponding need to expand the applications of this methodology to diverse populations This new volume addresses that need by focusing on the broader application of CBM providing practical new measures as well as detailing their use with specific student groups

Research Issues in Learning Disabilities Sharon Vaughn, Candace S. Bos, 2012-12-06 In this chapter we described issues in conducting intervention research with students with learning disabilities on the secondary level We maintained that interventions should be well grounded in theories of learning as well as characterizations of learning disabilities Pressley Scruggs that they should first be conducted in a series of highly controlled laboratory like experiments to carefully assess the potential utility of the intervention and that if the intervention is successful in highly controlled settings it should then be evaluated in classroom applications We maintained that research designs should evolve as the research questions become more applied and that the results of laboratory research should be used to support the findings of classroom applications Finally we described several research designs that we have found useful in conducting classroom intervention research There is a great deal more to conducting intervention research of course than experimental or quasi experimental design Intervention strategies likely to be effective must be identified relevant literature must be reviewed experimental materials must be developed and cooperative schools teachers parents and students must be located Nevertheless inadequate research designs can invalidate the best and most successful efforts in all of these areas while effective and practical research designs can do much to document the best practices and advance our knowledge of effective interventions with students with learning disabilities

Improving Human Learning in the Classroom George R. Taylor, Loretta MacKenney, 2008-10-03 Improving Human Learning in the Classroom provides a functional and realistic approach to facilitate learning through a demonstration of commonalities between the various theories of learning Designed to assist educators in eliciting students prior knowledge providing feedback transfer of knowledge and promoting self assessment

Taylor and MacKenney provide proven strategies for infusing various learning theories into a curriculum guiding educators to find their own strategies for promoting learning in the classroom Both quantitative and qualitative research methods investigate learning theories and reforms in education Quantitative data sources build the theoretical framework for educating the student as well as developing strategies for closing the achievement gap Taylor and MacKenney fuse personal experiences with solid strategies for human learning Executive Functions and the Frontal Lobes Vicki Anderson,Rani Jacobs,Peter J. Anderson,2010-10-18 This volume has as its primary aim the examination of issues concerning executive function and frontal lobe development While many texts have addressed these issues this is the first to do so within a specifically developmental framework This area of cognitive function has received increasing attention over the past decade and it is now established that the frontal lobes and associated executive functions are critical for efficient functioning in daily life It is also clear and of particular relevance to this text that these functions develop gradually through childhood and then deteriorate during old age These developmental trajectories and the impact of any interruption to them are the focus of this volume
