**Youth in Contemporary India** Parul Bansal, 2012-10-31 This book endeavors to be a study of identity in Indian urban youth. It is concerned with understanding the psychological themes of conformity, rebellion, individuation, relatedness, initiative, and ideological values which pervade youths' search for identity within the Indian cultural milieu, specifically the Indian family. In its essence, the book attempts to explore how in contemporary India the emerging sense of individuality in youth is seeking its own balance of relationality with parental figures and cohesion with social order. The research questions are addressed to two groups of young men and women in the age group of 20-29 years: Youth in Corporate sector and Youth in Non Profit sector. Methodologically, the study is a psychoanalytically informed, process-oriented, context-sensitive work that proceeds via narrations, conversations, and in-depth life stories of young men and women. Overall, the text reflects on the nature of inter-generational continuity and shifts in India.

**A Transformation Journey to Creative and Alternative Planetary Futures** Victor V. Motti, 2019-03-21 This book presents a counter trend against nationalism, religious extremism, xenophobia, and racism. It advocates an alternative globalization based not on trade, the economy, and politics, but on humanity's transcendence to a collective consciousness. Inspired by a pantheist worldview, it applies an integral perspective toward strategic foresight and anticipation on the planetary scale. Controversial disappearing and emerging binary oppositions are explained within the framework of the mythology of the Lord of Wisdom versus the Ignorant Mind. It shows that our anticipatory planetary era might be characterized by the acknowledgement of our zero knowledge as measured in the ocean of all disciplines: zero carbon for energy, zero war in politics, and zero killing in society; zero conscious beings excluded and zero existence as we have known it, as humanity merges into some higher and enriched complexity.

**Creativity and Leadership in Science, Technology, and Innovation** Sven Hemlin, Carl Martin Allwood, Ben Martin, Michael D. Mumford, 2014-03-14 Leadership is vital to creativity and successful innovation in groups and organizations leadership is however seldom studied in the academic literature as a creativity driver One reason for the lack of attention paid to leadership s effect on creativity may be the common belief that creativity cannot and should not be managed Creative individuals and groups are regarded as and indeed often are autonomous and self driving From this belief the erroneous conclusion is drawn that there is no need for leadership in creative environments and situations The better conclusion proposed by this book is that leadership not only stimulates creativity but that such a leadership in the science technology and innovation fields should specifically possess at least two features a expertise in the field s and b an ability to create support and encourage individuals groups and creative knowledge environments A number of specialist authors in this volume offer original theoretical empirical and applied chapters that elucidate how to better organize and lead creative efforts in science technology and innovation A number of important research questions are raised and answered including What kinds of leaderships are needed at different levels of S T organizations for a creative output What social and cognitive abilities and skills are needed for leadership in creative

environments How does leadership vary with different phases of the creative process This book offers concrete analysis of how leaders and managers can facilitate promote and organize for creative performance in science technology and in innovating organizations making it required reading for academic and industrial research leaders scientists and engineers
