Solomon did for a time under the sun This verse by verse tour of Solomons experience will help you understand where Solomons spiritual detour took him and where he finally came to realize he should have been going instead You will be encouraged to move out from under the sun to the abundance of life in the light of the Son **Medical Futility** Marjorie Bass Zucker, Howard D. Zucker, 1997-03-13 A wide ranging and authoritative survey of the complex issue of futile medical treatments **Planning and Analyzing Clinical Trials with Composite Endpoints** Geraldine Rauch, Svenja Schüler, Meinhard Kieser, 2018-05-22 This book addresses the most important aspects of how to plan and evaluate clinical trials with a composite primary endpoint to guarantee a clinically meaningful and valid interpretation of the results Composite endpoints are often used as primary efficacy variables for clinical trials particularly in the fields of oncology and cardiology These endpoints combine several variables of interest within a single composite measure and as a result all variables that are of major clinical relevance can be considered in the primary analysis without the need to adjust for multiplicity Moreover composite endpoints are intended to increase the size of the expected effects thus making clinical trials more powerful The book offers practical advice for statisticians and medical experts involved in the planning and analysis of clinical trials For readers who are mainly interested in the application of the methods all the approaches are illustrated with real world clinical trial examples and the software codes required for fast and easy implementation are provided The book also discusses all the methods in the context of relevant guidelines related to the topic To benefit most from the book readers should be familiar with the principles of clinical trials and basic statistical methods **Progress in Neurotherapeutics and Neuropsychopharmacology: Volume 2, 2007** Jeffrey L. Cummings, 2007-04-12 An essential update of recent clinical trials in the management of neurological and neuropsychiatric disorders *Design for Living* Robert Friedmann, 2017-11-29 Written in 1954 but unpublished in his lifetime Robert Friedmann s *Design for Living* asks that pertinent existential question how should we live Drawing on literary philosophical and theological sources Friedmann s answer begins with a critique of utilitarian ethics and popular apathy and proceeds through an existential preparation that ascends in confessional style to the question of the meaning of human life culminating in a fourfold set of principles regard concern service and love Along the way Friedmann s critical eye remains clearly fixed on his object of study lived experience and not abstract principles detached from day to day life and he intentionally guides his reader step by step up the mountain of spiritual and ethical inquiry in a deliberate and serious attempt to educate the heart mind and soul At once accessible and scholarly while troubling our contemporary divide between religion and the secular *Design for Living* presents a rare vision of human meaning and purpose that will appeal to scholarly and public readers alike *Principles and Practice of Clinical Trials* Steven Piantadosi, Curtis L. Meinert, 2022-07-19 This is a comprehensive major reference work for our SpringerReference program covering clinical trials Although the core of the Work will focus on the design analysis and interpretation of scientific data from clinical trials a broad spectrum of clinical trial application areas will be covered in detail This is an

Matters of Life and Death David Orentlicher,2021-03-09 Philosophical debates over the fundamental principles that

should guide life and death medical decisions usually occur at a considerable remove from the tough real world choices made in hospital rooms courthouses and legislatures David Orentlicher seeks to change that drawing on his extensive experience in both medicine and law to address the translation of moral principle into practice a move that itself generates important moral concerns Orentlicher uses controversial life and death issues as case studies for evaluating three models for translating principle into practice Physician assisted suicide illustrates the application of generally valid rules a model that provides predictability and simplicity and more importantly avoids the personal biases that influence case by case judgments The author then takes up the debate over forcing pregnant women to accept treatments to save their fetuses He uses this issue to weigh the avoidance of perverse incentives an approach to translation that follows principles hesitantly for fear of generating unintended results And third Orentlicher considers the denial of life sustaining treatment on grounds of medical futility in his evaluation of the tragic choices model which hides difficult life and death choices in order to prevent paralyzing social conflict Matters of Life and Death is a rich and stimulating contribution to bioethics and law It is the first book to examine closely the broad problems of translating principle into practice And by analyzing specific controversies along the way it develops original insights likely to provoke both moral philosophers and those working on thorny issues of life and death
