Alters 1st Edition:

Science and Pseudoscience in Clinical Psychology, First Edition Scott O. Lilienfeld, Steven Jay Lynn, Jeffrey M. Lohr, 2012-02-21 This is the first major text designed to help professionals and students evaluate the merits of popular yet controversial practices in clinical psychology differentiating those that can stand up to the rigors of science from those that cannot. Leading researchers review widely used therapies for alcoholism, infantile autism, ADHD, and posttraumatic stress disorder; herbal remedies for depression and anxiety; suggestive techniques for memory recovery; and self-help models. Other topics covered include issues surrounding psychological expert testimony, the uses of projective assessment techniques, and unanswered questions about dissociative identity disorder. Providing knowledge to guide truly accountable mental health practice, the volume also imparts critical skills for designing and evaluating psychological research programs. It is ideal for use in advanced undergraduate and graduate level courses in clinical psychology, psychotherapy, and evidence-based practice.

Edwards, 2020-06-15 The notion of a person or even an object having a double has been explored in the visual arts for ages and in myriad ways portraying the body and its soul: a woman gazing at her reflection in a pool or a man overwhelmed by his own shadow. In this edited collection focusing on nineteenth and twentieth century western art, scholars analyze doppelgangers, alter egos, mirror images, double portraits, and other pairings human and otherwise appearing in a large variety of artistic media. Artists whose works are discussed at length include Richard Dadd, Salvador Dalí, Egon Schiele, Frida Kahlo, the creators of Superman, and Nicola Costantino among many others. The practice of navigation and nautical astronomy. [With] Tables [and] Supplement to the first ed Henry Raper, 1840 Schutzian Research: Volume 7 / 2015
