Volume 6 inside front cover Alvar Aalto, Architect: The Aalto house, 1935-36 Alvar Aalto, Alvar Aalto Foundation, 2003-01-01 This is a 28 volume set of monographs of the Finnish architect Alvar Aalto's 1898-1976 architectural and planning works. This series of books which presents about five hundred built or unrealised designs will be the most comprehensive work on Aalto's architectural output. Published by the Alvar Aalto Foundation and the Alvar Aalto Academy, written by experts and including hitherto unpublished original material and new photographs, the monographs offer a penetrating view of Aalto's life. V 6 Inside front cover *An Analysis of the Work of Finnish Architect Alvar Aalto* Laurence Keith Loftin, 2005 Aalto is often called the quintessential modernist and at first glance this appears to be rightly so. The forms are organic, the materials compatible. Yet Aalto is also the master of the ambiguous space and mystery in one building, one senses history but not exactly why, and in another Aalto has combed a curve to create an almost unbearable tension. **Controspazio**, 1998 **The Architectural Drawings of Alvar Aalto, 1917-1939** Alvar Aalto-museo, 1994 **Alvar Aalto Houses** Jari Jetsonen, Alvar Aalto, Markku Lahti, 2005 During the course of a career spanning over 50 years, Alvar Aalto designed nearly 100 single family houses. Many of them are architectural gems where his thoughts about dwelling and architecture come together. Aalto considered experimental building to be very important in his opinion; there should always be an opportunity for experimentation in every project, for it is only in that way that architecture can be promoted and quality improved for the good of the little man. It was specifically in the designing of single family houses that Aalto could realize new ideas. Aalto's single family houses can be divided into three groups: houses for individuals, the client of which was nearly always a relative or friend; houses designed for industrial institutions or other communities; and type or standard houses. All the houses presented in *Alvar Aalto Houses* were originally designed for private clients. The book presents eight single family houses by Aalto from the 1920s to the end of the 1960s, built in Finland, Estonia, and France. Book jacket **Alvar Aalto** Alvar Aalto, 1975 *Alvar Aalto in the Finnish Context* Kirmo Mikkola, 2005-05-30 This book, first published in Finnish in 1985 under the title *Aalto*, is a critical introduction to Finnish architect Alvar Aalto, 1898-

1976 written by one of Aalto's Finnish architectural contemporaries Kirmo Mikkola 1934-1986 The book is divided into six sections dealing with different aspects of Aalto's architecture from his classical beginnings to urban planning as well as his various professional and intellectual associates Mikkola debunks the common opinion of a reticent Aalto to determine the roots of his thinking seeing him as a mediator of influences from a wide variety of sources The book was originally targeted at a Finnish audience and so its translation requires interpreters two architect scholars who knew Mikkola well Juhani Pallasmaa and Aino Niskanen The book also sheds light on a young generation of Finnish architects that distanced itself from Aalto as a role model pinpointed here by the inclusion of the essay Snowballs 1948 by Aulis Blomstedt Often quoted by Finnish architectural scholars the publication finally of an English translation of Mikkola's book will appeal to those international scholars and students who have been aware of the lack of critical perspectives from Aalto's Finnish architect contemporaries
