complicit in these problems Drawing on insights from critical psychiatry and critical gerontology this book explores these problems and the relations between them revealing how they are facilitated by neuro agnostic dementia studies work that lacks robust biopolitical critiques and sociopolitical alternatives In response the book makes the case for a more biopolitically engaged neurocritical dementia studies and shows how such a tradition might be realised through the promotion of a promissory sociopolitics of dementia The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution CC BY 4.0 license Funded by University of Manchester UK
