Scarce Migrant Birds of Britain and Ireland J.T.R. Sharrock,2010-11-30

Scarce migrant birds of Britain and Ireland how many are seen How regularly do they come Where do they occur When are they likely to be spotted The above questions are authoritatively answered by the author Dr J T R Sharrock honorary secretary of the British Ornithologists Union s Record Committee and of the Rare Breeding Birds Panel joint convener of the European Ornithological Atlas Committee and a member of the British Birds Rarities Committee and of the Irish Records Panel Dr Sharrock takes a ten year period and investigates in detail all the records of a selection of birds which occur here as

scarce migrants birds from Europe from Asia and from America He considers their breeding and wintering ranges and the patterns of their records in Britain and Ireland and tries to determine also why do they visit us at all Jacket design by Robert Gillmor

Birds in Ireland Clive Hutchinson, 2010-09-30 Birdwatching has become an increasingly popular pastime in Ireland as elsewhere Nor is all of the birdwatching done by the Irish Many professional ornithologists from Britain and Western Europe find good reason to study Ireland's birds as do the numerous birdwatching visitors each year Clive Hutchinson a leading Irish ornithologist has compiled this comprehensive review of birds in the Republic and Northern Ireland to coincide with the 21st anniversary year of the Irish Wildbird Conservancy's foundation and he has had the IWC's active support throughout The book is timely for other reasons too Knowledge about the status and distribution of birds in Ireland has increased greatly since the 1960s and this is reflected in the detailed species accounts which form the major part of the book Factors which led to this greater knowledge recent changes in bird distribution and status and reasons for the absence of some species are topics discussed in the book's introductory chapters Other subjects covered are Ireland's topography climate and habitats a review of ornithology and ornithologists in Ireland over the last 100 years and conservation programmes of more recent times John Busby's superb illustrations more than 100 are a feature of the book helping to set the Irish scene as well as its birds Jacket paintings by John Busby

British and Irish Butterflies Roger L H Dennis, Peter B Hardy, 2018-07-13 Islands are special places they can be havens for unique plants and animals and refuges for wildlife This book investigates the biogeography of butterfly species over the British islands particularly the factors that influence their presence on the islands and that have made each island's butterfly fauna distinctive The book contains a full log of records of species on the islands and much supporting information The first three chapters set the scene illustrating the basics of island biogeography theory their changing circumstances during the current Holocene interglacial and studies of natural history of British butterflies that mark the islands as the most intensively studied region for wildlife in the world The book advances by increasing resolution downscale from a European continental perspective through patterns and changes on the British mainland a comparison of the two dominant islands of Britain and Ireland to a close inspection of the dynamics of species on the multitude of offshore islands Detailed investigations include contrasts in species richness on the islands and then of the incidences of each species Case studies highlight the continual turnover of species on islands Attention is then given to evolutionary changes since the time that glaciers enveloped Europe A powerful message is conveyed for the maintenance of butterfly species on the smaller British islands now experiencing population losses at a rate unprecedented since the spread of the last ice sheets the incontrovertible importance of maintaining populations of species on nearby mainland sources for islands as pools for future migrants

The Atlas of Wintering Birds in Britain and Ireland Peter Lack, 2011-04-14 This companion volume to The Atlas of Breeding Birds of Britain and Ireland is derived from surveys of birds present in Britain and Ireland during the three winters 1981/82 1982/83 and 1983/84 The surveys were

organised by the British Trust for Ornithology and the Irish Wildbird Conservancy as were the earlier breeding birds surveys The Winter Atlas maps 200 species 192 of which have full page two colour maps faced by a page of text The texts written by over 100 specialists comment on the survey results the species generally and the distribution and abundance as mapped In addition there are introductory chapters on the maps the weather in the three winters bird patterns and movements and appendices describing the planning organisation field methods and processing of the survey data from record cards to computer output and maps A team of 23 artists led by Robert Gillmor has provided the line drawings which head the species accounts This is a print on demand edition of the Atlas It is a black and white reproduction of the original two colour book
