Phil Glatz, Michael Bourke, 2006-03-02 The Beak Trimming Handbook for Egg Producers is a straightforward practical guide to beak trimming of egg laying hens to minimise cannibalism. It provides comprehensive information on why birds peck and how pecking can lead to problems like cannibalism, the methods available to beak trim birds, why a particular method should be chosen and at what age birds may be trimmed. The book addresses quality control of beak trimming, enabling egg producers to be confident that equipment is properly set up, that birds are handled and trimmed according to best practice and farm biosecurity is maintained. Management of birds following beak trimming to protect the welfare of the birds and to ensure maximum productivity is covered in detail. Best practice, current methods of beak trimming, costs of trimming and ways to reduce the use of trimming are examined along with expected future developments. The advantages and disadvantages of beak trimming are fully explored, covering both public and industry attitudes to the operation. Alternatives to beak trimming are canvassed to understand how the use of fitted devices, enrichment devices, abrasives, low lighting and the choice of low pecking strains of birds can reduce the need for beak trimming. Finally, the book discusses strategies for minimising cannibalism and how the chosen strategy may be documented and justified. Please note that this book is spiral bound.

The Art of Falconry, by Frederick II of Hohenstaufen Frederick II (Holy Roman Emperor), Casey Albert Wood, Florence Marjorie Fyfe, 1943-06 *De Arte Venandi cum Avibus* was written shortly before the year 1250 by Frederick II, Holy Roman Emperor, King of Sicily and Jerusalem, in whose court, with its remarkably cosmopolitan and highly intellectual life, may be found the real beginning of the Italian Renaissance. In spite of its title, it is far more than a dissertation on hunting. There is a lengthy introduction dealing with the anatomy of birds, an intensely interesting description of avian habits and the excursions of migratory birds. Indeed, this ancient book has long been recognized as the first zoological treatise written in the critical spirit of modern science. The sumptuous volume now in hand is, however, the first translation into English of the complete text, originally divided into a prologue and six books. Together, the translators and editors have at last made available this classic work and have adorned it with notes, comments, bibliographies and glossary. They have produced a work of great value to zoologists, especially the ornithologist, and also to everyone interested in the history of science and in medieval art and letters.
