

# CourseCARD

## Introduction

This course is designed to provide students with a comprehensive understanding of the principles and practices of project management. The course covers the entire project lifecycle, from initiation to closure, and includes practical applications of project management tools and techniques.

## Course Objectives

By the end of this course, students will be able to:

- Define project management and its importance in various organizations.
- Identify the key components of a project, including scope, time, cost, and quality.
- Develop a project charter and a project management plan.
- Execute project tasks and manage resources effectively.
- Monitor project progress and control risks.
- Close a project and evaluate its performance.

## Topics

The course covers the following topics:

- Project Management Fundamentals
- Project Initiation
- Project Planning
- Project Execution
- Project Monitoring and Control
- Project Closure

## Prerequisites

There are no prerequisites for this course. However, students should have a basic understanding of business and management concepts. The course is suitable for students from various disciplines, including Business Administration, Engineering, and Information Systems.

## Resources

Students are encouraged to use the following resources:

- Textbook: *Project Management: The Managerial Process* by Larson and Raymond
- Online Resources: [www.pmi.org](http://www.pmi.org), [www.projectmanagement.com](http://www.projectmanagement.com)

## Methodology

The course is delivered through a combination of lectures, case studies, and practical exercises. Students will participate in group projects and simulations to apply the concepts learned in the classroom.

## Assessment

Students will be assessed through a combination of assignments, quizzes, and a final project. The final project will require students to develop a project plan and execute a project, demonstrating their understanding of project management principles.

## Course Details
