Handbook of Autopsy Practice Jurgen Ludwig, 2002-07-18 The second edition of Handbook of Autopsy Practice appeared in 1979 under the title Current Methods of Autopsy Practice W B Saunders Company that edition was out of print in the early 1980s Now over 20 years later it appeared timely to thoroughly update the material in a third edition by adding what we have learned in the meantime and eliminating text that has become obsolete There is an acute need for a complete and readily accessible resource for autopsy work because few pathologists still specialize in autopsy practice and as a consequence expertise in autopsy technology and autopsy pathology has declined Our colleagues in the forensic field have remained the only large group of autopsy practitioners For most other pathologists the economic situation time constraints and the steadily decreasing autopsy rates have made a career in autopsy pathology unattractive This state of affairs is perpetuated by a lack of interest among many of our young colleagues partly because the teaching of autopsy pathology and autopsy techniques during most residencies is insufficient Numerous articles have been moaned this situation but the trend I fear is irreversible Still autopsies will be requested particularly in complex and difficult situations where the questions remaining after the death of the patient might challenge even experienced autopsy pathologists Under these circumstances

this Handbook of Autopsy Practice should meet a particular need by providing the prosecutor with a source of information when it is most required in the autopsy room *The Practice of Clinical Neuropsychology* Greg J. Lamberty, John C. Courtney, Robert L. Heilbrunner, 2005-10-10 This volume is a contemporary survey of practice related issues in clinical neuropsychology in the United States Section 1 includes chapters on topics relevant to practitioners in clinical neuropsychology such as managed care practice trends business aspects of practice training and credentialing internet resources for practice and research in the private practice setting Section 2 provides narrative descriptions of a range of different practice settings Authors give firsthand descriptions of their settings billing and coding practices how they interface with colleagues and referral sources and other unique aspects of their practices Settings range from independent practices to university based departments for both pediatric and adult practices The volume will be a valuable resource for graduate students interested in clinical neuropsychology postdoctoral fellows embarking on a career in the field and practitioners interested in enhancing their practices via the experiences of a diverse group of successful practicing neuropsychologists
