Osinga, 2007-01-24 John Boyd is often known exclusively for the so called OODA loop model he developed This model refers to a decision making process and to the idea that military victory goes to the side that can complete the cycle from observation to action the fastest This book aims to redress this state of affairs and re examines John Boyd s original contribution to strategic theory By highlighting diverse sources that shaped Boyd s thinking and by offering a comprehensive overview of Boyd s work this volume demonstrates that the common interpretation of the meaning of Boyd s OODA loop concept is incomplete It also shows that Boyd s work is much more comprehensive richer and deeper than is generally thought With his ideas featuring in the literature on Network Centric Warfare a key element of the US and NATO s so called military transformation programmes as well as in the debate on Fourth Generation Warfare Boyd continues to exert a strong influence on Western military thinking Dr Osinga demonstrates how Boyd s work can help us to understand the new strategic threats in the post 9 11 world and establishes why John Boyd should be regarded as one of the most important post modern strategic theorists

Felser,2025-09-12 From Christian believers in the Apocalypse and the Rapture to New Age enthusiasts of prophecies concerning the year 2012 Doomsday lore has been a part of culture a myth that colors how we perceive the world Why do we remain obsessed with Doomsday myths even when they fail to materialize What if we haven't recognized the true message of these myths Blending history psychology metaphysics and story philosopher and author Joseph Felser explores the spiritual questions raised by these enduring myths Along the way he consults the work of Joseph Campbell Carl Jung Marie Louise von Franz Black Elk Wovoka Itzhak Bentov Jane Roberts Seth Hermann Hesse Ingo Swann David Bohm Fred Alan Wolf J Allen Boone William James and Robert Monroe through ever widening circles of understanding Felser suggests that our obsession with The End of the World hides a repressed healthy longing for reconciliation with our inner and outer worlds with nature and our own natural spirituality He urges us to recognize and act upon that longing When we begin to listen to nature's voice and pay heed to our own dreams including visions intuitions and instinctive promptings the greatest revolution in all history will unfold We can create a future of our own choosing a beginning rather than an ending     **Radical Nature** Christian de Quincey,2010-02-22 An exploration of consciousness in all matter from quantum to cosmos Outlines theories of consciousness in ancient and modern philosophy from before Plato to Alfred North Whitehead Reveals the importance of understanding mind in matter for our relationships with the environment with other people even with ourselves Are rocks conscious Do animals or plants have souls Can trees feel pleasure or pain Where in the great unfolding of life did consciousness first appear How we answer such questions can dramatically affect the way we live our lives how we treat the world of nature and even how we relate to our own bodies In this new edition of the award winning Radical Nature Christian de Quincey explores the hard problem of philosophy how mind and matter are related and proposes a radical and surprising answer that matter itself tingles with consciousness at the deepest level It's there in the cells of every living creature even in molecules and atoms Tracing the lineage of this idea through Western philosophy and science he shows that it has a very noble history from before Plato to Alfred North Whitehead He reveals that the way to God is through nature and that understanding how body and soul fit together has surprising consequences for our relationships with our environment with other people and even with ourselves     *Library of Congress Catalog* Library of Congress,1970 A cumulative list of works represented by Library of Congress printed cards     *Exploring the Crack in the Cosmic Egg* Joseph Chilton Pearce,2014-02-15 The classic follow up to the bestselling The Crack in the Cosmic Egg Explains the process of acculturation and the mechanisms that create our self limiting cosmic egg of consensus reality Reveals how our biological development innately creates a crack in our cosmic egg leaving a way to return

to the unencumbered consciousness of childhood Explores ways to discover and explore the crack to restore wholeness to our minds and reestablish our ability to create our own realities In this classic follow up to his bestselling *The Crack in the Cosmic Egg* Joseph Chilton Pearce explains the process of acculturation and the mechanisms that create our self limiting cosmic egg of consensus reality Laying the groundwork for his later classic *Magical Child* Pearce shows that we go through early childhood connecting with the world through our senses With the development of language and the process of acculturation not only do our direct experiences of the world become much less vivid but our innate states of nonordinary consciousness become suppressed Trapped in a specific cultural context a cosmic egg we are no longer able to have or even recognize mystical experiences not mediated by the limitations of our culture Motivated primarily by a fear of death our enculturation literally splits our minds and prevents us from living fully in the present Drawing from Carlos Castaneda's writings about Don Juan and the sense of body knowing Pearce explores the varieties of nonordinary consciousness that can help us return to the unencumbered consciousness of our infancy He shows that just as we each create our own cosmic egg of reality through cultural conditioning we also innately create a crack in that egg Ultimately certain shifts in our biological development take place to offset acculturation leaving an avenue of return to our primary state Pearce examines the creation of the egg itself and ways to discover its inherent cracks to restore wholeness to our minds release us from our fear of death and reestablish our ability to create our own realities through imagination and biological transcendence **Symbolic**
