June 2010 budget Great Britain: Parliament: House of Commons: Treasury Committee,2010-07-23 In this report the Treasury Committee examine some of the risks and uncertainties in the approach taken by the Chancellor in the June 2010 Budget The June Budget was more radical towards debt reduction than that taken by the previous government but it also signalled a move to rebalance the economy away from the public and toward the private sector The Committee expresses concern that there might be a slight increase in the chance of near term negative growth and that the Office for Budget Responsibility's independence has been called into question It notes that net trade is not expected to contribute positively to GDP growth in 2010 and that the VAT increase will affect inflation On welfare the proposals to reduce housing benefit for Jobseeker's Allowance claimants after one year will affect some 300 000 people and the Committee calls for fuller information about those affected especially households with children The aim to make the measures fair in absolute terms and as a proportion of income is supported though the Committee is concerned that the poorest fare slightly less well than middle income groups The inclusion of charts showing the distributional effects of the Budget is welcomed The Committee also comments on the problems faced by small and medium sized enterprise in raising credit and on the bank levy The Chancellor's statement that he has built an element of

caution into the fiscal mandate is taken as a signal that he would introduce measures to stimulate the economy if economic conditions demanded

Revitalizing Entrepreneurship Education Karin Berglund, Karen Verduyn, 2018-01-19 Within mainstream scholarship it is assumed without question that entrepreneurship and entrepreneurship education are desirable and positive economic activities Drawing on a wide range of theoretical approaches and political philosophical perspectives critical entrepreneurship studies has emerged to ask the questions which this assumption obscures Students of entrepreneurship need to understand why and how entrepreneurship is seen as a moral force which can solve social problems or protect the environment or even to tackle political problems It is time to evaluate how such contributions and insights have entered our classrooms How much if any critical discussion and insight enters our classrooms How do we change when students demand to be taught how to do it not to be critical or reflexive If educators are to bring alternative perspectives into the classroom it will entail a new way of thinking There is a need to share ideas and practical approaches and that is what the contributions to this volume aim to do and to illuminate new ways forward in entrepreneurship education

Sold American Charles F. McGovern, 2009-01-06 At the turn of the twentieth century an emerging consumer culture in the United States promoted constant spending to meet material needs and develop social identity and self cultivation In *Sold American* Charles F McGovern examines the key players active in shaping this cultural evolution advertisers and consumer advocates McGovern argues that even though these two professional groups invented radically different models for proper spending both groups propagated mass consumption as a specifically American social practice and an important element of nationality

and citizenship Advertisers McGovern shows used nationalist ideals icons and political language to define consumption as the foundation of the pursuit of happiness Consumer advocates on the other hand viewed the market with a republican inspired skepticism and fought commercial incursions on consumer independence The result says McGovern was a redefinition of the citizen as consumer The articulation of an American Way of Life in the Depression and World War II ratified consumer abundance as the basis of a distinct American culture and history Investigation of Organized Crime in Interstate Commerce: pt. 1-1A.
