Airports A Century Of Architecture:

Airports Hugh Pearman, 2004 Since their emergence at the start of the 20th century airports have become one of the most distinctive and important of architectural building types Often used to symbolize progress freedom and trade they offer architects the chance to design on a grand scale At the beginning of the 21st century airports are experiencing a new and exciting renaissance as they adapt and evolve into a new type of building one that is complete adaptable and catering to a new range of demands As passengers are held in airports far longer than they used to be they have also now become destinations in their own right Airports celebrates the most important airport designs in the world Beginning with an exploration of the first structures of aviation and early designs such as the Berlin Tempelhof the book explores the key airports of the century up to the present day including Eero Saarinen's TWA Terminal in New York Renzo Piano's Kansai Airport and Norman Foster's Chek Lap Kok in Hong Kong **Airports, Cities, and the Jet Age** Janet R.

Bednarek, 2016-08-31 This book explores the relationship between cities and their commercial airports These vital transportation facilities are locally owned and managed and civic leaders and boosters have made them central to often expansive economic development dreams including the construction of architecturally significant buildings However other metropolitan residents have paid a high price for the expansion of air transportation as battles over jet aircraft noise resulted not only in quieter jet engine technologies but profound changes in the metropolitan landscape with the clearance of both urban and suburban neighborhoods And in the wake of 9 11 the US commercial airport has emerged as the place where Americans most fully experience the security regime introduced after those terrorist attacks *Encyclopedia of Twentieth*

Mironov, 2020-02-26 Throughout the 20th century and into the 21st the emergence of airports as gateways for their cities has turned into one of the most important architectural undertakings Ever since the first manned flight by the Brothers Orville and Wilbur Wright on December 17th 1903 utilitarian sheds next to landing strips on cow pastures evolved into a completely new building type over the next few decades into places of Modernism as envisioned by Le Corbusier and Frank Lloyd Wright who themselves never built an airport to eventually turn into icons of cultural identity progress and prosperity Many of these airports have become architectural branding devices of their respective cities regions and countries created by some of the most notable contemporary architects This interdisciplinary cultural study deals with the historical formation and

transformation of the architectural typology of airports under the aspect of spatial theories This includes the shift from early spaces of transportation such as train stations the synesthetic effect of travel and mobility and the effects of material innovations on the development occupation and use of such spaces The changing uses from mere utilitarian transportation spaces to ones centered on the spectacular culture of late capitalism consumption and identity formation in a rapidly changing global culture are analyzed with examples both from architectural and philosophical points of view The future of airport architecture and design very much looks like the original idea of the Crystal Palace and Parisian Arcades to provide a stage for consumption social theatre and art exhibition

The Evolution of Airport Design Robert Stewart, 2024-05-13 This is the first book to comprehensively cover the evolution of airport design from the start of commercial aviation in 1919 to the present day Many books have been written about airport design at a particular moment in history but none have rigorously considered why where when and how the ideas we now take for granted originated This book traces the history of airport design considering the philosophies adopted by designers the functional layouts they have developed and the resultant form of the airport through a series of 40 case studies divided into 7 eras of approximately 20 years each The themes include The philosophies underpinning airport design The evolution of design responses How airports have avoided obsolescence Identification of the key turning points The evolution of master plans and terminal concepts in response to increasing traffic volumes The future of airports in terms of environmental sustainability and the Covid 19 hiatus The case studies are international covering the USA Germany the UK France the Netherlands Singapore Saudi Arabia Japan Hong Kong Malaysia South Korea Thailand Spain United Arab Emirates China Turkey Mexico Australia and Poland They are illustrated with full colour many of which have not been published before and form part of an incredible graphic package This book is essential reading for architects engineers planners and environmentalists alike

Lukas, 2007-01-01 The Themed Space Locating Culture Nation and Self is the first edited collection focused on the subject of the themed space Twelve authors address a range of themed spaces including restaurants casinos theme parks and other spaces like airports and virtual reality ones The text is organized into four sections theming as authenticity theming as nation theming as person and theming as mind

Dwell, 2009-06 At Dwell we re staging a minor revolution We think that it s possible to live in a house or apartment by a bold modern architect to own furniture and products that are exceptionally well designed and still be a regular human being We think that good design is an integral part of real life And that real life has been conspicuous by its absence in most design and architecture magazines

Infrastructure and the Architectures of Modernity in Ireland 1916-2016 Gary A. Boyd, John McLaughlin, 2016-12-05 At the formation of the new Republic of Ireland the construction of new infrastructures was seen as an essential element in the building of the new nation just as the adoption of international style modernism in architecture was perceived as a way to escape the colonial past Accordingly infrastructure became the physical manifestation the concrete identity of these objectives and architecture formed an integral part of this

narrative Moving between scales and from artefact to context Infrastructure and the Architectures of Modernity in Ireland 1916 2016 provides critical insights and narratives on what is a complex and hitherto overlooked landscape one which is often as much international as it is Irish In doing so it explores the interaction between the universalising and globalising tendencies of modernisation on one hand and the textures of local architectures on the other The book shows how the nature of technology and infrastructure is inherently cosmopolitan Beginning with the building of the heroic Shannon hydro electric facility at Ardnacrusha by the German firm of Siemens Schuckert in the first decade of independence Ireland became a point of varying types of intersection between imported international expertise and local need Meanwhile at the other end of the century by the year 2000 Ireland had become one of the most globalized countries in the world site of the European headquarters of multinationals such as Google and Microsoft Climatically and economically expedient to the storing and harvesting of data Ireland has subsequently become a repository of digital information farmed in large single storey sheds absorbed into anonymous suburbs In 2013 it became the preferred site for Intel to design and develop its new microprocessor chip the Galileo The story of the decades in between of shifts made manifest in architecture and infrastructure from the policies of economic protectionism to the opening up of the country to direct foreign investment and the embracing of the EU is one of the influx of technologies and cultural references into a small country on the edges of Europe as Ireland became both a launch pad and testing ground for a series of aspects of designed modernity
