Airwar Essays On Its Theory And Practice:

Airwar Phillip S. Meilinger, 2003 These essays cover a wide range of subjects and tell the story of air power's evolution over the past century **Air & Space Power Journal fall 03** , **Flying to Victory** Mike Bechthold, 2017-04-06 Canadian born flying ace Raymond Collishaw 1893 1976 served in Britain's air forces for twenty eight years As a pilot in World War I he was credited with sixty one confirmed kills on the Western Front When World War II began in 1939 Air Commodore Collishaw commanded a Royal Air Force group in Egypt It was in Egypt and Libya in 1940 41 during the Britain's Western Desert campaign that he demonstrated the tenets of an effective air ground cooperation system Flying to Victory examines Raymond Collishaw's contribution to the British system of tactical air support a pattern of operations that eventually became standard in the Allied air forces and proved to be a key factor in the Allied victory The British Army and Royal Air Force entered the war with conflicting views on the issue of air support that hindered the success of early operations It was only after the chastening failure of Operation Battleaxe in June 1941 fought according to army doctrine that Winston Churchill shifted strategy on the direction of future air campaigns ultimately endorsing the RAF's view of mission and target selection This view adopted principles of air ground cooperation that Collishaw had demonstrated in combat Author Mike Bechthold traces the emergence of this strategy in the RAF air campaign in Operation Compass the first British offensive in the Western Desert in which Air Commodore Collishaw's small force overwhelmed its Italian counterpart and disrupted enemy logistics Flying to Victory details the experiences that prepared Collishaw so well for this campaign and that taught him much about the application of air power especially how to work effectively with the army and Royal Navy As Bechthold shows these lessons learned altered the Allied approach to tactical air support and ultimately changed the course of the Second World War **The Air War, 1939-1945** Richard J. Overy, 2020-11-24 The Air War 1939 1945 was first written in the late 1970s when there was very little academic interest in the history of air power What there was focused largely on combat The book was intended to provide a global history of the air war by looking at combat but also the broader context of technology production intelligence and leadership The book sought to address the question of why the Allies in the end won decisively the war in the air and concluded that Axis air forces were too tied to a narrow conception of air power attached to surface forces rather than air power exercised in a broader framework of air defense logistics strategic bombing and technological development The book has been assigned reading in military and air force academies for the past forty years The Air War 1939 1945 immediately and permanently altered the way that historians have examined the nature of aerial warfare during World War II Overy's ingenious examination of the global nature of planning building deploying and utilizing air forces remains the finest overall study of the topic more than a quarter century after its first publication conclusions drawn in this work are even today an integral part of U S Air Force doctrine Dik A Daso US Air Force Chief of Staff's Reading List This is an outstanding book on a subject in which past controversy has often generated more heat than light The strength of the

book is Overy's masterly discussion of the economic problems of sustaining air forces in war and of hitting the right balance between quantity production of current models and diversion of resources to research and technical innovation Truly this is a book that deserves attention from all those who wish to study and learn from the history of warfare G C Peden Naval War College Review T ightly written The Air War 1939 1945 is essential reading for all military historians James J Hudson Military Affairs O ne of the best books on aviation in World War II Kenneth P Werrell Air Power History An important and successful book The Economist Highly effective The result as so often with sound scholarship is the ruthless dispelling of myths A J P Taylor author of The Origins of the Second World War The Air War is an excellent and stimulating book which both needs and deserves slow and careful reading It is an ambitious book too and Dr Overy should be congratulated for breaking down national histories in writing his history of air power during the Second World War Malcolm Smith The International History Review A recognized classic Richard B Frank The Journal of American History Originally published in 1980 and still the best one volume aerial history of World War II Richard Overy's classic work remains profound and highly original it deepens our understanding not only of World War II but of military history in general The SHAFR Guide Online A n outstanding book The Air War is a serious and profound treatise that analyses those various military and civilian themes which in combination determined the nature of the struggle in the air during the Second World War The Air War is something of a novelty in aeronautical literature It is to be hoped that it will serve as a model for other books to come in this important field Alfred Gollin The English Historical Review Overy provides operational accounts of the air forces role in Europe and in the Pacific Then and most exceptionally he deals separately with all facets of the air war planning organization manpower equipment and doctrine honest broadly informed and well stocked with useful data Kirkus R J Overy examines the whole war period from the point of view of each of the warring powers and gives us not only a study of military campaigns but also a highly successful examination of aerial doctrine economic and scientific mobilization and the political diplomatic and military aspects of the management of hostilities This fine study analyzes the achievements and the failures of the aerial component of the war This good analysis of many studies done on this subject makes possible a new balanced synthesis from an objective point of view Sam H Frank The American Historical Review

Special Bibliography Series ,1957 *The Means to Kill* Gerrit Dworok, Frank Jacob, 2015-11-12 Throughout human history technological innovation has functioned as a driver of civilization and inspired many people's belief in progress When it comes to warfare where technology is applied with a cruel and deadly logic a nuanced view is needed From siege engines to drones innovation has often served a less enlightened aim elimination of the enemy This collection of new essays from specialists in military history examines the interdependence between war and technology from a number of regional perspectives

Changing War Gary Sheffield, Peter Gray, 2013-10-24 In 1918 the British Expeditionary Force BEF played a critical role in defeating the German army and thus winning the First World War This Hundred Days campaign August to November 1918 was the greatest series of land victories

in British military history 1918 also saw the creation of the Royal Air Force the world's first independent air service from the Royal Flying Corps and the Royal Naval Air Service Until recently British histories of the First World War have tended to concentrate on the earlier battles of 1916 and 1917 and often underplayed this vitally important period Changing War fills this significant gap in our knowledge by providing in depth examinations of key aspects of the operations of the British Army the Royal Air Force and its antecedents in the climactic year of the First World War Written by a group of established historians and emerging scholars it sheds light not only on 1918 but on the revolutionary changes in warfare that took place at that time

Military Planning in the Twentieth Century Mary Ann Robinson, 1984 The essays commentaries and speeches which form this volume were presented at the Eleventh Military History Symposium held at the United States Air Force Academy on 10-12 October 1984 This conference is a biennial event sponsored jointly by the Department of History and the Association of Graduates of the United States Air Force Academy Begun in 1967 the series seeks to address problems in military history which have received limited attention and to provide a forum in which scholars may present the results of their research In this manner we hope to stimulate and encourage interest in military history among civilian and military scholars members of the armed forces and the cadets of the United States Air Force Academy

The Development of British Tactical Air Power, 1940-1943 Matthew Powell, 2016-09-10 This book explores the development of tactical air power in Britain between 1940 and 1943 through a study of the Royal Air Force's Army Co operation Command It charts the work done by the Command during its existence and highlights the arguments between the RAF and Army on this contentious issue in Britain Much is known about the RAF both in the years preceding and during the Second World War particularly the exploits of Fighter Bomber and Coastal Commands yet the existence of the RAF's Army Co operation Command is little known Through extensive archival research Matthew Powell maps the creation and work of the RAF's Army Co operation Command through an analysis of tactical air power developments during the First World War and inter war periods highlighting the debates and arguments that took place between the Air Ministry and the War Office

The Age of Airpower Martin Van Creveld, 2011-04-12 Airpower more than any other factor has shaped war in the twentieth century In this fascinating narrative history Martin van Creveld vividly portrays the rise of the plane as a tool of war and the evolution of both technology and strategy He documents seminal battles and turning points and relates stories of individual daring and collective mastery of the skies However the end of airpower's glorious age is drawing near The conventional wisdom to the contrary modern precision guided munitions have not made fighter bombers more effective against many kinds of targets than their predecessors in World War II U S ground troops calling for air support in Iraq in 2003 did not receive it any faster than Allied forces did in France in 1944 And from its origins on airpower has never been very effective against terrorists guerrillas and insurgents As the warfare waged by these kinds of people grows in importance and as ballistic missiles satellites cruise missiles and drones increasingly take the place of quarter billion dollar manned combat

aircraft and their multi million dollar pilots airpower is losing utility almost day by day **Peace Studies** Matthew Evangelista,2005 The academic field of Peace Studies emerged during the Cold War to address the nature and sources of interstate and internal conflict and methods to prevent it and deal with its consequences **Air Power in the Age of Total War** John Buckley,2006-05-09 Warfare in the first half of the 20th century was fundamentally and irrevocably altered by the birth and subsequent development of air power This work assesses the role of air power in changing the face of battle on land and sea Utilizing late 1990s research the author demonstrates that the phenomenon of air power was both a cause and a crucial accelerating factor contributing to the theory and practice of total war For instance the expansion of warfare to the homefront was a direct result of bombing and indirectly due to the extent of national economic mobilization required to support first rate air power status In addition the move away from the principle of total war with the onset of the Cold War and the replacement of air power by ICBMs is thoroughly examined This work should provide students of international history war studies defence and strategic studies with an insight into 20th century warfare Understanding Modern Warfare David Jordan,James D. Kiras,David J. Lonsdale,Ian Speller,Christopher Tuck,C. Dale Walton,2016-07-14 A fully revised and updated new edition of this leading introduction to the theory and conduct of warfare in the twentieth and twenty first centuries The book combines analysis of key concepts theory and military doctrine with reference to relevant examples from history and integrates the land sea and air environments **Critical Practices in International Theory** James Der Derian,2009-01-13 Critical Practices in International Theory brings together for the first time the essays of the leading IR theorist James Der Derian The essays cover a variety of issues central to Der Derian s work including diplomacy alienation terrorism intelligence national security new forms of warfare the role of information technology in international relations poststructuralist theory and the military entertainment media matrix The book includes a framing introduction written for this volume in which Der Derian provides historical and theoretical context for a diverse body of work Discussing his own influences and reflecting upon the development of international theory he advocates a critical pluralist approach to the most pressing problems of world politics Written in the eloquent style that marks out Der Derian as one of the most provocative and innovative thinkers in international relations this collection is essential reading for scholars and students interested in the past present and future of international relations James Der Derian is a Watson Institute research professor of international studies at Brown University where he directs the Global Security Program and the Global Media Project He is the author of many articles and books including the highly acclaimed *Virtuous War* 2001 2009 *Using History, Making British Policy* P. Beck,2006-07-11 The extent to which history has been used to inform policy remains a neglected topic Focusing upon the 1957 Whitehall policy initiative this book enhances our knowledge of post 1945 Britain illuminates debates about the nature and the use of history in the contemporary world most notably the relationship between history and policy Military planning in the twentieth century , War, Peace and International Relations Colin Gray,James J.

Wirtz,2023-10-24 This textbook provides a comprehensive introduction to the strategic history of the past two centuries showing how those 200 years were shaped and reshaped extensively by war The book takes a broad view of what was relevant to the causes courses and consequences of conflict The volume provides students with a strong grounding in the contribution of war to the development of the modern world from the pre industrial era to the age of international terrorism and smart weapons Covering all the major wars of the past two centuries the third edition has been revised and updated and now includes new introductory essays at the start of each section to help students recognize historical turning points and strategic themes revised and updated material on the post Cold War period accommodating new developments and contemporary perspectives new material on non Western views on strategy especially Sun Tzu a new chapter on The age of acceleration and great power competition starting with the death of Bin Laden and ending with the Ukraine crisis a new Conclusion offering a synthesis between the message of earlier editions and the state of strategy today This textbook will be essential reading for students of strategic studies security studies war studies International Relations and international history
