comorbidities leading to disability represents a real social and economic burden for National Health Systems worldwide The presence of multiple and associated comorbidities often represents an obstacle to being admitted to hospitals for the treatment of metabolic diseases On the other hand clinical units with optimal standards for the treatment of pathological conditions in normal weight patients are often structurally and technologically inadequate for the care of patients with extreme obesity The aim of this book is to focus on the pathophysiological and rehabilitative aspects of disabling obesity highlighting multidisciplinary rehabilitation interventions as key to counteracting the disabling aspects of complicated obesity
